

Agenda for the Regular Meeting of Board of Commissioners Monday, May 22, 2023 - 7:00 pm Brentwood City Hall

Call to Order by Mayor Roll Call Invocation by Commissioner Andrews Pledge of Allegiance to the Flag by Commissioner Dunn

Public Hearing

- 1. Public hearing on Ordinance 2023-02 AN APPROPRIATION ORDINANCE FOR THE CITY OF BRENTWOOD, TENNESSEE FOR THE FISCAL YEAR BEGINNING JULY 1, 2023 AND ENDING JUNE 30, 2024 INCLUDING BUDGET FOR BRENTWOOD EMERGENCY COMMUNICATIONS DISTRICT
- 2. Public hearing on Ordinance 2023-06 AN ORDINANCE OF THE CITY OF BRENTWOOD, TENNESSEE TO ESTABLISH THE PROPERTY TAX RATE FOR THE FISCAL YEAR BEGINNING JULY 1, 2023 AND ENDING JUNE 30, 2024
- 3. Public hearing for proposed six-year Capital Improvements program for Fiscal Years 2024-2029

Public hearings on rezoning ordinances are primarily intended as opportunities for citizens to voice their views in support of or opposition to a rezoning that has been proposed by other parties. Persons speaking on behalf of the property owner or the applicant for the rezoning are allowed opportunities to speak when the ordinance is considered for passage on first and second reading, and are encouraged to confine their remarks to those opportunities.

Approval or Correction of Minutes

May 8, 2023

Comments from Citizens – Individuals may comment on any item included in the Consent/Regular agenda or on any other matter regarding the City of Brentwood. All comments should be directed to the Board of Commissioners. Citizens who wish to request that an item be moved from the Consent Agenda to the Regular Agenda for discussion should make that known to the Board at this time.

Report from City Manager Report from the City Attorney Reports and comments by Commissioners and Mayor Note: All matters listed under the Consent Agenda are considered to be routine and will generally be enacted by one motion. Except for any items that are removed from the Consent Agenda, there will be no separate discussion of these items at this time.

Consent Agenda

- 1. Resolution 2023-55 A RESOLUTION AUTHORIZING THE SALE AND DISPOSAL OF SURPLUS PROPERTY HELD BY THE CITY, for adoption

<u>Subject</u>

Public Hearing for the Proposed Six-Year Capital Improvements Program for Fiscal Years 2024-2029

Background

The proposed FY 2024-2029 Capital Improvements Program (CIP) was reviewed with the Board of Commissioners at a work session on Thursday, April 6, 2023. The staff reviewed each project and received initial guidance and direction on the appropriateness and priorities in the program. The CIP has since been posted on the City's website and circulated in the community for citizen review and comment. This is the first of three (3) formal public hearings by the City Commission on the proposed CIP, which are scheduled for Monday, May 22, 2023, Monday, June 12, 2023, and Monday, June 26, 2023. A Resolution to adopt the six-year CIP will be presented to the City Commission for consideration and approval at the June 26, 2023 meeting.

Res 2023-55 - Approval to Surplus One Fire & Rescue Department Pickup Truck at Auction **Submitted by:** Brian Goss, Fire & Rescue

Department: Fire & Rescue

Information

<u>Subject</u>

Resolution 2023-55 - Approval to Surplus One Fire & Rescue Department Pickup Truck at Auction

Background

The Fire & Rescue Department requests City Commission approval to dispose of one Ford F-250 pickup truck at auction utilizing Govdeals.com. This vehicle was first assigned to Station 4 as a general purpose squad truck and then rotated to Station 1 to extend its use. The pickup is a 2007 model year with approximately 50,000 miles. Despite the low miles, it was recently diagnosed as needing a significant engine rebuild and a front-wheel bearing/brake failure forced us to park it permanently. If approved to be auctioned, the purchaser will need to have the vehicle trailered or towed from the property.

A replacement truck was requested and approved in the FY 2023 Annual Operating Budget and the Fire and Rescue Department took delivery of that vehicle last month. All City-related decals and emergency equipment have been or will be removed prior to sale. The condition of the vehicle will be clearly stated in the auction, as well as the disclaimer that it is being sold as-is.

Please contact the Fire Chief with any questions.

Staff Recommendation

Staff recommends approval to surplus one Ford F-250 truck to be sold on Govdeals.com.

Fiscal Impact

Res 2023-56 - Authorization for the Remaining Funds Raised for the Purpose of the 50th Celebration to be Used for an Inclusive Playground

Submitted by: Karen Harper, Finance

Department: Finance

Information

<u>Subject</u>

Res 2023-56 - Authorization for the remaining funds held in the donations held in trust fund (DHT), raised for the purpose of the 50th celebration to be used for an inclusive playground.

Background

On April 9, 2018, the City Commission approved Resolution 2018-24 establishing a limited-duration ad hoc 50th Anniversary Steering Committee to plan a year-long celebration leading up to April 15, 2019 - the 50th anniversary of the date the City was incorporated. On May 14, 2018, Resolution 2018-36, the creation of a 50th Anniversary Account within the Donations Held in Trust (DHT) Fund, was approved by the City Commission for the purpose of funding the 50th Anniversary events hosted by the City of Brentwood.

The Committee raised funds to cover the expenditures incurred for various events throughout the year. At the conclusion of the events, the balance in the DHT 50th Anniversary Account was \$86,150. At the final meeting of the 50th Anniversary Steering Committee, it was recommended to the City Commission that the remaining funds raised for the purpose of the 50th celebration be used for an inclusive playground to be built inside the Brentwood City limits.

Use of the remaining 50th Anniversary funds was factored into the overall budget for the Miles Together inclusive playground in Granny White Park that was completed earlier in FY 2023. Per the policies for the DHT Fund, City Commission approval for use of the remaining funds for the playground and subsequent closure of the 50th Anniversary Fund is required.

Staff Recommendation

Staff is requesting formal approval to reclassify \$86,150 in FY 2023 expenses previously paid from the Capital Projects Fund to the 50th Celebration DHT account and to then close the 50th Celebration DHT account once the balance is \$0.

Previous Commission Action

On April 9, 2018, the City Commission approved Resolution 2018-24 establishing a limited-duration ad-hoc 50th Anniversary Steering Committee.

On May 14, 2018, Resolution 2018-36, the creation of a 50th Anniversary Account within the Donations Held in Trust Fund was approved by the City Commission. Attached to this

authorization request is the 50th Steering Anniversary Trust Fund Guidelines.

On October 28, 2019, Commissioner Andrews read an announcement from the 50th Anniversary Steering Committee recommending that the remaining funds be used for an inclusive playground.

A RESOLUTION OF THE CITY OF BRENTWOOD, TENNESSEE **ESTABLISHING AN AD-HOC 50th ANNIVERSARY STEERING COMMITTEE**

WHEREAS, the City of Brentwood desires to provide a yearlong celebration in 2019 for the 50th anniversary of the date the City was incorporated; and

WHEREAS, opportunities may exist that have yet to be identified for development of these events and fundraising options; and

WHEREAS, the City would be well served to have a steering committee of engaged and interested residents and volunteer board members to assist with the planning of the various events and celebrations:

NOW, THEREFORE, BE IT RESOLVED BY THE CITY OF BRENTWOOD, **TENNESSEE, AS FOLLOWS:**

SECTION 1. That a limited-duration ad hoc committee of the Brentwood Board of Commissioners is hereby established pursuant to Attachment "A", Guidelines for the Ad-Hoc 50th Anniversary Steering Committee.

SECTION 1. That the Committee shall consist of five (5) Brentwood residents appointed by the City Commission who are not current volunteer board members; six (6) volunteer board members appointed by their respective boards, one (1) each from the Park Board, Historic Commission, Tree Board, Planning Commission, Library Board, and the Environmental Advisory Board; and one (1) City Commissioner appointed by the City Commission. The Community Relations Director shall serve as a non-voting member.

SECTION 2. That this resolution shall take effect from and after its passage, the general welfare of the City of Brentwood, Williamson County, Tennessee requiring it.

Brentwood City Commission Agenda <u>Meeting Date:</u> 05/22/2023 Approval of Recommended Roadway Repairs and Improvements List for FY 2024 <u>Submitted by:</u> Todd Hoppenstedt, Public Works <u>Department:</u> Public Works

Information

<u>Subject</u>

Approval of Recommended Roadway Repairs and Improvements List for FY 2024.

Background

Attached is a list of City of Brentwood maintained street segments recommended for repair and improvement in FY 2024. The list is mostly prepared using data from the Commission-approved contract with StreetScan for a video assessment of all City streets which was conducted in October 2021, with data provided to Public Works in January 2022. In addition, staff physically evaluates the top priorities each year to further refine the list. We consider pavement condition, traffic type, traffic volume, speed limit, current maintenance demands, drainage concerns, reports of failures, and any plans for known upcoming utility work that may impact these streets before preparing the recommended list.

The proposed FY 2024 budget for Roadway Repairs and Improvements is \$2,700,000 comprised of \$800,000 from the General Fund and \$1,900,000 from the State Street Aid Fund. The attached list of street segments includes recently approved asphalt rejuvenation on a list of street segments resurfaced over the past two years and a list of our traditional recommended street resurfacing list. The list represents the highest priorities at this time, except for some streets that are intentionally delayed until upcoming utility work has been completed. Additional consideration is given to grouping work areas and including multiple streets into a grouping when possible. This minimizes resident and motorist frustration by not proposing different street segments in certain areas over multiple years. As work progresses through the year, staff will continually review actual project costs to determine what additional work can be added to the contract in order to optimize the use of available funds.

In addition to the full-width paving list, there will be many smaller patches and curb repairs added throughout the fiscal year. The list currently represents only about 94% of the available budget. The remaining 6% contingency is being retained to provide the flexibility to address any curb repairs, manhole/valve box adjustments, or failures like settlement, shoving, and pavement buckles. Additionally, the contingency helps to protect against any fluctuations in the TDOT bituminous cost index throughout the course of the year.

Staff Recommendation

Staff recommends the approval of the FY 2024 Paving List.

Please direct any questions to the Public Works Director.

Fiscal Impact

Amount :\$2,700,000Source of Funds:See Detail BelowAccount Number:See Below

Fiscal Impact:

The Recommended work list fits within the budgeted amount for Roadway Repairs and Improvements, with approximately a 6.5% contingency for any urgent repairs that may arise throughout the year, or any flucuations in the TDOT Bituminous Asphalt Index.

Brentwood City Commission Agenda

Meeting Date: 05/22/2023

Ordinance 2023-02 - An Appropriations Ordinance for the City of Brentwood for Fiscal Year 2023-2024

Submitted by: Karen Harper, Finance

Department: Finance

Information

<u>Subject</u>

Ordinance 2023-02 - An Appropriations Ordinance for the City of Brentwood for the Fiscal Year Beginning July 1, 2023, and Ending June 30, 2024

Background

The accompanying ordinance, upon passage, will authorize appropriations (expenditures) for the City of Brentwood for Fiscal Year 2023-2024. The FY 2024 proposed budget was submitted to the City Commission on May 2, 2023, and was subject to detailed review at the budget work session held on May 11, 2023.

Projected General Fund revenues for next fiscal year total \$51,834,100, while appropriated expenditures will be \$51,832,900 leaving a projected year-end surplus equal to \$1,200 of revenues over expenditures.

In addition, as outlined in the City Manager's budget letter and discussed at the May 11 work session, funding for certain proposed projects and equipment purchases in the FY 2024 Capital Improvements Program will require a FY 2023 special year-end transfer totaling \$11,375,000 from the General Fund to the Capital Projects Fund, \$1,165,000 to the Equipment Replacement Fund, and \$640,000 to Facilities Maintenance Fund, funded through current year excess revenue collections. Also included in the special FY 2023 year-end transfer is a \$2,000,000 transfer to the Municipal Center. When the year-end transfers are taken into account, the <u>minimum</u> unassigned fund balance in the General Fund as of June 30, 2023 is estimated at \$53.4 million.

The ordinance providing for the proposed FY 2023 year-end special appropriation transfers, as well as other "clean up" budget amendments, will be presented to the City Commission for formal consideration on first reading at the June 12, 2023 meeting.

Please note that the allocation of \$244,400 in education funding, the allocation of \$202,000 in the Parks and Recreation Department budget to specific recreation and community service providers, and allocation of \$3,250 to Mid-Cumberland Human Resource Agency must be determined by the City Commission and approved by motion prior to approval of the FY 2024 Appropriations Ordinance on second and final reading at the June 26, 2023 Commission meeting.

If the appropriations ordinance is approved on first reading, final reading of this ordinance will

not occur until the June 26, 2023 commission meeting. However, a public hearing for this ordinance will be scheduled for the June 12, 2023 meeting.

Please contact the Finance Director or City Manager if you have any questions or need additional information.

Staff Recommendation

Staff recommends approval of Ordinance 2023-02.

Previous Commission Action

Section 6-22-124(b) of the City Charter requires the Board of Commissioners to adopt the Appropriations Ordinance before the first day of the new fiscal year beginning July 1.

SECTION 3. That total actual expenditures for the funds shown in Section 1 herein shall not exceed total appropriations for said funds, except as may be provided by ordinance to amend the budget. The total actual expenses for the funds shown in Section 2 herein shall not exceed line item budget, except as may be provided by City Manager approval to adjust the budget.

SECTION 4. That the following amounts in the Water and Sewer Fund are projected operating revenues and expenses for the fiscal year beginning July 1, 2023 and ending June 30, 2024 and are provided for informational purposes.

| Operating Revenues | \$ 21,551,675 |
|--------------------|------------------|
| Operating Expenses | \$ 21,080,380 |

SECTION 5. That the following amounts in the Municipal Center Fund are projected operating revenues and expenses for the fiscal year beginning July 1, 2023 and ending June 30, 2024 and are provided for informational purposes.

| Operating Revenues | \$ 839,075 |
|--------------------|---------------|
| Operating Expenses | \$ 838,870 |

SECTION 6. That the City maintains certain Funds Held in Trust (FHIT) accounts for the use of special program funding for which no expenditure appropriation is required. Expenditures from FHIT accounts are approved by authorized personnel as funds are available.

SECTION 7. That a detailed line item financial plan to support the budget as set forth herein shall be provided to the Board of Commissioners and to the various departments of the City, which financial plan shall be used as guidance and generally followed in incurring expenditures and obligations on behalf of the City.

SECTION 8. That this ordinance shall take effect from and after its final passage, or fifteen days after its first passage, whichever occurs later, the general welfare of the City of Brentwood, Williamson County, Tennessee, requiring it.

Brentwood City Commission Agenda
<u>Meeting Date:</u> 05/22/2023
Ordinance 2023-06 - An Ordinance to Adopt the Property Tax Rate for Fiscal Year 2023-2024
<u>Submitted by:</u> Karen Harper, Finance
<u>Department:</u> Finance

Information

<u>Subject</u>

Ordinance 2023-06 - An Ordinance to Adopt the Property Tax Rate for the Fiscal Year Beginning July 1, 2023 and Ending June 30, 2024.

Background

The accompanying ordinance provides for the adoption on first reading of the tax rate to fund the FY 2023-2024 proposed General Fund budget. The proposed tax rate is \$0.29 per \$100 of assessed value of taxable property. This levy represents the same <u>effective</u> property tax rate for the City of Brentwood for the 33rd year in a row.

If approved, please note that final reading of Ordinance 2023-06 will not occur until the Monday, June 26, 2023 meeting. Formal public hearings are scheduled at three City Commission meetings set for Monday, May 22, 2023, Monday, June 12, 2023, and Monday, June 26, 2023.

Please contact the Finance Director if you have any questions.

Staff Recommendation

The staff recommends approval of Ordinance 2023-06 on first reading.

Fiscal Impact

<u>Amount :</u> <u>Source of Funds:</u> <u>Account Number:</u> <u>Fiscal Impact:</u> The budgeted amount for both real and personal property taxes for FY2024 is \$12,950,000.

Ordinance 2023-06

ORDINANCE 2023-06

AN ORDINANCE OF THE CITY OF BRENTWOOD, TENNESSEE TO ESTABLISH THE TAX LEVY FOR THE FISCAL YEAR BEGINNING JULY 1, 2023, AND ENDING JUNE 30, 2024

BE IT ORDAINED BY THE CITY OF BRENTWOOD, TENNESSEE, AS FOLLOWS:

SECTION 1. That the tax levy for the City of Brentwood, Tennessee for the fiscal year beginning July 1, 2023, and ending June 30, 2024, on each \$100.00 of assessed value of all property (real, personal, public utility, merchants ad valorem, and mixed) within the City of Brentwood, Tennessee, shall be the sum of twenty-nine cents (\$0.29), prorated and distributed in accordance with the Budget Ordinance for the same period, same being Ordinance 2023-02.

SECTION 2. That this ordinance shall take effect from and after its final passage, or fifteen days after its first passage, whichever occurs later, the general welfare of the City of Brentwood, Williamson County, Tennessee, requiring it.

Brentwood City Commission Agenda

Meeting Date: 05/22/2023

Ordinance 2023-07 - Amends Chapter 56, Article I, Division I and Article II, Division 2 through 5 of the Municipal Code

Submitted by: Todd Petrowski, Planning & Codes

Department: Planning & Codes

Information

<u>Subject</u>

The attached Ordinance 2023-07 requests the amendment of Chapter 56, Article I, Division I and Article II, Division 2 through 5 of the Municipal Code.

Background

The City's participation in the National Flood Insurance Program (NFIP) requires compliance with Federal Emergency Management Agency (FEMA) guidelines for development within identified local floodplain areas. The City's participation in the program is essential so that individual structures built or improved in the floodplain will remain eligible for flood insurance under the federal program.

Over the past several years, the Commission has considered multiple amendments to the City's Flood Prevention Regulations found in Article II, Chapter 56 of the Municipal Code. These regulations address the limitations/requirements related to new development, redevelopment, and modifications to existing structures within the designated flood zones across the City.

After the September 2021 adoption of Ordinance 2021-04 allowing porches and decks for elevated homes in the floodway, there was a consensus among Commissioners that instead of continuing to piecemeal changes to the regulations each time a unique situation arises, it would be best to undertake a thorough review of the entire ordinance with the assistance of an outside consultant that specializes in flood regulations and compliance with applicable FEMA standards.

On November 8, 2021, the City entered into an agreement with Schwalls Consulting LLC from Orlando FL. Mr. Schwalls began evaluating and comparing our flood regulations to Metro Nashville, Franklin, and Williamson County. A City Commission work session was held on January 24, 2022, and informational meetings with the public were held on March 2nd & 3rd, 2022. Mr. Schwalls and City staff began incorporating suggested changes and presented these for consideration to TEMA on August 4th, 2022. After some back and forth with TEMA & FEMA, the City received preliminary approval on April 4, 2023.

The proposed changes include:

- 1. Increase the minimum freeboard requirement from 2 feet to 3 feet, and adding a legal nonconforming component for existing structures currently at the 2-foot requirement.
- 2. Allow non-elevated attached garages and detached structures (including detached garages)

in the floodway fringe (not floodway), with limitations like flood resistant materials, parking, storage and access only, flood openings, and the requirement of a non-conversion agreement to be filed at the Williamson County Register's Office.

- 3. Change the square footage calculation for new porches on elevated homes in the floodway to allow more flexibility.
- 4. Revise the LOMR, LOMR-F and CLOMR language to be consistent with FEMA requirements.
- 5. Allow existing deck coverings to remain for elevated floodway homes.
- 6. Add additional restrictions for fences in the floodway.
- 7. Cut/fill change to require location of cut to be hydraulically connected.
- 8. Various language clean-up items per TEMA & FEMA request.

A version of the Code that shows the additions in a **red** font and the deleted text as strikethrough is attached below.

If the proposed ordinance is approved on first reading, second and final reading is scheduled for the June 12th meeting. A Planning Commission review of the proposed amendments is not required because they are not part of the zoning ordinance.

Should you have any questions or require additional information, please feel free to contact Todd Petrowski, Senior City Planner.

Staff Recommendation

Staff recommends approval of Ordinance 2023-07 on first reading.

Previous Commission Action

On September 27, 2021, the Board of Commissioners voted to approve Ordinance 2021-04 on second and final reading.

On February 22, 2021, the Board of Commissioners voted to approve Ordinance 2021-05 on second and final reading.

On October 28, 2019, the Board of Commissioners voted to approve Ordinance 2019-09 on second and final reading.

<u>Fiscal Impact</u>

Ordinance 2023-07 Strikethrough version showing changes

ORDINANCE 2023-07

AN ORDINANCE OF THE CITY OF BRENTWOOD, TENNESSEE, PROVIDING THAT THE CODE OF ORDINANCES BE AMENDED BY REVISING VARIOUS SECTIONS OF CHAPTER 56, ARTICLE I, DIVISION 1 AND ARTICLE II, DIVISIONS 2 THROUGH 5 IN REGARD TO THE STORMWATER MANAGEMENT, EROSION CONTROL AND FLOOD DAMAGE PREVENTION

WHEREAS, since 1972, the City of Brentwood has incorporated floodplain management regulations into the Brentwood Municipal Code, with a goal of reducing flood risks to residents and property owners; and

WHEREAS, adoption and enforcement of effective floodplain management regulations allow the City to be eligible for participation in the National Flood Insurance Program; and

WHEREAS, the Legislature of the State of Tennessee has, in Tenn. Code Ann. §§ 13-7-201 through 13-7-212, delegated the responsibility to local governments to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry; and

WHEREAS, Chapter 56, Article II of the Code of Ordinances of the City of Brentwood establishes regulations governing flood damage prevention; and

WHEREAS, the proposed amendments set forth in this ordinance will allow the City to continue protecting the public health, safety and welfare through effective floodplain management.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY OF BRENTWOOD, TENNESSEE, AS FOLLOWS:

SECTION 1. That the title of Chapter 56 of the Code of Ordinances of the City of Brentwood, Tennessee, is hereby amended to read "CHAPTER 56 STORMWATER MANAGEMENT, EROSION CONTROL AND FLOOD DAMAGE PREVENTION".

SECTION 2. That Section 56-2 the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-2. Definitions.

The following words, terms and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

Best Management Practices Manual means a manual approved for use by the city's engineering director to provide examples of structural or non-structural practices intended to address water quantity or quality. The Best Management Practices Manual is intended to be utilized by design professionals and/or construction personnel in the course of development and construction activities within the city.

Channel means the portion of a natural stream which conveys normal flows of water.

Combined sewer means a sewer which conveys both sanitary sewage and stormwater.

Construction activities means activities which include but are not limited to clearing and grubbing, grading, excavating and demolition.

Cut means the portion of land surface or area from which earth has been or will be removed by excavation; also, the depth below original ground surface to excavated surface.

Disturbed area means an area of land subjected to erosion due to the removal of vegetative cover and/or earthmoving activities, including filling.

Drainage means the interception and removal of groundwater or surface water by natural or artificial means.

EPA means the United States Environmental Protection Agency.

Erosion means any removal or loss of soil by the action of wind and water. Erosion includes both the detachment and transportation of soil particles.

Erosion control measures means one or more of the following measures, or other methods of slowing or stopping the removal of soil by wind, water, or gravity used singularly or in combination as appropriate:

- (1) *Diversion:* A swale or channel with supporting ridge (berm, dike or wall) constructed across a sloping land surface along the contour, or with predetermined grades, to intercept and divert surface runoff before it gains sufficient volume or velocity to create conditions of erosion.
- (2) *Drains:* Underground conduits or filter drains to reduce surface runoff or lower a high-water table.
- (3) *Grade stabilization structures:* Drop structures made of concrete, corrugated metal pipe or other suitable materials which dissipate the energy of flowing water by dropping it in a relatively short horizontal distance.
- (4) *Grassed waterways:* A natural or constructed waterway, usually broad and shallow, covered with erosion-resistant grasses used to carry surface water.
- (5) *Land grading:* Reshaping the ground surface by grading to planned slopes and configurations that will prevent excessive erosion conditions.
- (6) *Mulching:* The application of plant or other suitable materials on the soil surface to conserve moisture, reduce erosion and aid in establishing plant cover.
- (7) *Sediment barriers:* A temporary barrier installed to intercept runoff containing sediment. The barrier shall filter sediment and allow runoff to pass through. Sediment barriers may include straw bale barriers and silt fences.

Excavation means the act of removing dirt or soil (see Cut).

Fill means the portion of land surface or area to which soil, rock or other materials have been or will be added; height above original ground surface after the material has been or will be added.

Grade means the slope or elevation of the ground surface prior to or after cutting and filling.

Grading means any operation or occurrence by which the existing site elevations are changed by cutting, filling, borrowing or stockpiling, or where any ground cover, natural or manmade, is removed, or any buildings or other structures are removed or any watercourse or body of water, either natural or

manmade, is relocated on any site, thereby creating an unprotected area. Grading shall be synonymous with land disturbance activity.

Hazardous material means any material, including any substance, waste, or combination thereof, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may cause, or significantly contribute to, a substantial present or potential hazard to human health, safety, property or the environment when improperly treated, stored, transported, disposed of or otherwise managed.

Immediate threat to public health and safety means a very serious threat to the community or adjacent property including, but not limited to, clogged drainage ditches, flooding of adjacent properties, threat of landslides or other problems which should be resolved without delay. In instances where this is the case, verbal instructions to remedy the situation with follow-up of written notification shall be sufficient to meet the notification requirements of this article.

Illicit discharge means either of the following:

- (1) Any discharge to a municipal separate storm sewer system that is not composed entirely of stormwater, except as authorized herein.
- (2) Any infiltration into the storm drain system resulting from spills, illegal dumping, or contaminated runoff from residential, commercial or industrial properties.

Illicit connection means either of the following:

- (1) Any drain or conveyance, whether on the surface or subsurface, that allows an illicit discharge to enter the storm drain system, including but not limited to any conveyance that allows any non-stormwater discharge (including sewage, processed wastewater or wash water) to enter the storm drain system or any connection to the storm drain system from an indoor drain or sink, regardless of whether said connection had been previously allowed, permitted or approved by an authorized enforcement agency.
- (2) Any drain or conveyance connected from a commercial or industrial land use to the storm drain system that has not been documented in plans, maps or equivalent records and approved by an authorized enforcement agency.

Land disturbance plan means the plan required before a grading permit may be issued. A land disturbance plan consists of a narrative description and appropriate drawings and plans that spell out the methods, techniques and procedures to be followed on a site to control erosion and other potential degradation of adjoining or nearby properties, during and after development, including methods of final stabilization of the site.

Municipal separate storm sewer system (MS4) means the system of conveyances (including sidewalks, roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, manmade channels, or storm drains):

- (1) Owned or operated by the city;
- (2) Designed or used for collecting or conveying stormwater;
- (3) Which is not a combined sewer; and
- (4) Which is not part of a sanitary sewage treatment facility operated by a public utility.

National Pollutant Discharge Elimination System (NPDES) permit means a permit issued by the EPA or by the state under authority delegated by the EPA that authorizes the discharge of pollutants to waters of the United States, whether the permit is applicable on an individual, group, or general area-wide basis.

Non-stormwater discharge means any discharge to the storm drain system that is not composed entirely of stormwater.

Owner means the person or entity holding the registered title to property. The city property tax rolls shall be prima facie evidence that the person or entity listed therein is the registered owner.

Permit holder means the owner of the property or the owner's representative in whose name a permit has been applied for and issued by the city.

Pollutant means anything that causes or contributes to pollution. Pollutants may include, but are not limited to: paints, varnishes and solvents; oil and other automotive fluids; non-hazardous liquid and solid wastes and yard wastes; refuse, rubbish, garbage, litter or other discarded or abandoned objects and accumulations, so that some may cause or contribute to pollution; floatables; pesticides and fertilizers; hazardous substances and wastes; sewage, fecal coliform and pathogens; dissolved and particulate metals; animal wastes; wastes and residues that result from constructing a building or structure; and noxious or offensive matter of any kind.

Potable water means any water from a public water supply system or private well that is suitable to drink.

Sediment means rocks, sand, gravel, silt or other material deposited by action of wind, water or gravity.

Sedimentation means the action of settling out of the soil particles which are transported by wind, water or gravity.

Site means any tract, lot or parcel of land or combination of tracts, lots or parcels of land proposed for development.

Stop work order means an order issued by the city requiring construction activity on a site to be stopped.

Stormwater means any accumulation of water from rain, snow or other forms of precipitation.

Stormwater runoff means stormwater flowing over the surface of the ground or collected in channels, watercourses or conduits, measured in depth of inches.

Stripping means any activity which removes or significantly disturbs the vegetative cover, including clearing and grubbing operations and top soil stripping.

Subdivision regulations means the City of Brentwood document written to cover a wide range of activities related to subdivision and/or development of land within the City of Brentwood as included as appendix A of the zoning ordinance.

Substantial rebuild lot means a lot on which modification to an existing structure or the lot itself is proposed, including but not limited to, residential addition, swimming pool, or other accessory building or structure such that the increase in impervious surface is greater than or equal to 800 square feet.

TDEC means the Tennessee Department of Environment and Conservation.

USGS means the U.S. Geological Survey, an agency of the U.S. Department of the Interior.

Vegetative cover means grasses, shrubs, trees and other vegetation which hold and stabilize soils.

Wastewater means the discharge of any water or other liquid, other than uncontaminated stormwater.

Waterway natural area or *WNA* means the area adjacent to, on either side, an intermittent or perennial stream waterway, as determined by the city, state, or USGS topographic information that is to remain in its natural state to protect the quality and ecology of the stream.

SECTION 3. That Section 56-13 of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-13. Land disturbance plan.

A land disturbance plan required under the provisions of this article shall comply with the requirements set forth in this section. The complexity of the plan shall be commensurate with the severity of site conditions and potential for off-site damage. The engineering department may require additional information if deemed necessary and appropriate to evaluate the feasibility of the plan.

- (1) *Basic plan requirements.* The plan shall identify the specific and appropriate erosion control practices and sediment trapping facilities proposed for the site to be disturbed, as well as a schedule for implementation and maintenance. The plan shall address the specific requirements of sections 58-14 through 58-18 herein. The plan shall also identify final stabilized conditions for the site, provisions for removing temporary control measures and stabilization of the site when temporary measures are removed, permanent stormwater conveyance structures and maintenance requirements for any permanent measures.
- (2) *Professional design.* The land disturbance plan shall be developed by a licensed Tennessee professional engineer or landscape architect when the area of disturbance meets substantial rebuild lot requirements, is greater than five acres, affects parking areas, or when potentially hazardous soil or drainage conditions exist due to types of soils, steep grades, floodplain development or nearby lakes, streams or large drainage ditches.
- (3) *Erosion control.* Erosion control measures shall be designed and carried out in accordance with the TDEC construction general permit for storm water discharge and the requirements of the city's Best Management Practices Manual. Areas that are to be developed or excavated shall apply these guidelines, fitting the appropriate measures to the specific soils and topography so as to minimize soil erosion and surface water runoff. The erosion control measures shall be maintained, and replaced if necessary, until vegetative cover is significantly established.
- (4) *Protection of natural vegetation and trees.* Natural vegetation shall be retained and protected whenever feasible during construction. If an area is stripped of vegetation during construction, the exposed area shall be limited to the smallest practical size, and duration of the exposure limited to the shortest practical time.
- (5) *Minimum information required.* It shall be at the discretion of the city's engineering director to determine how much information is necessary to obtain a grading permit. The engineering director may also determine the number of paper copies of the land disturbance plan to be submitted, and/or may require that the plan be submitted in a specified electronic format. At a minimum, a land disturbance plan shall contain the following:

- a. The registration seal and signature of the Tennessee licensed professional engineer or landscape architect who prepared the plan.
- b. Name, address and telephone number of the applicant, and the owners and developer, if other than the applicant, of the property to be graded.
- c. Email address for the design engineer or landscape architect.
- d. A brief project description.
- e. Current field run topography and actual elevations based on an identified benchmark by a Tennessee licensed land surveyor. Drawings showing pre-development topographic conditions and post-development grades, at a scale appropriate to the land area of the plan, and with contour intervals no greater than two feet. All existing improvements and utilities public and private shown. The plan shall include off-site existing topographic conditions extended to a minimum of 25 feet beyond the boundaries of the subject tract if grading is designed to be within 20 feet of any boundary line. Information on all public roads and utilities adjoining the subject property shall also be included. Identification of existing trees in excess of four-inch caliper and trees to be preserved shall be shown.
- f. The site location, boundaries, adjacent properties, location of any existing or proposed structures on the property or on adjacent land within 100 feet of the area to be disturbed, floodplain areas, ditch lines and any existing on-site and off-site structural or natural features of the land which have a significant impact on drainage or sediment control.
- g. The location and a description of temporary and permanent erosion control measures and drainage apparatuses to be constructed and structural changes and improvements to the land, including clearing and grading limits, daily cleanup and site control practices (to include designated concrete washout locations and waste disposal measures) and other activities to mitigate the adverse impact of land disturbance.
- h. Vicinity map with legible street names. Address, and zoning in title block. Include subdivision and lot number where applicable. Adjacent lot numbers and parcel data. Include recorded plat book and page number in title block.
- i. Standard details to include typical drainage swales, silt fence, temporary construction entrance, tree protection, retaining walls (if applicable) sealed by a Tennessee licensed professional engineer for walls that are four feet or greater in height, and additional items as necessary to mitigate the adverse impact of land disturbance.
- j. Property lines with bearing and distances to two decimal places. Building setbacks, easements, and all public utilities shown, labeled and dimensioned.
- k. Proposed contours distinguishable from existing contours. Spot elevations as necessary for proposed improvements. Site elevations, existing LFE, proposed LFE, minimum LFE.
- 1. Retaining walls greater than four feet in height shall be certified by a Tennessee licensed professional engineer upon completion. Retaining wall heights to meet Subdivision Regulation and Municipal Code requirements.
- m. Drainage for sites shall be designed by a Tennessee licensed professional engineer. Hydraulic and hydrologic data to meet Subdivision Regulation requirements. All existing and proposed drainage pipes (including gutter downspouts if extended more than ten feet from structure) shall be shown on the plan.
- n. Site improvements are subject to regulation and code requirements applicable to the type of improvement proposed.

SECTION 4. That the title of Chapter 56, Article II of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows: "ARTICLE II. FLOOD DAMAGE PREVENTION".

SECTION 5. That Section 56-61 of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-61. Findings of fact.

The city hereby finds:

- (1) The city and its board of commissioners wish to maintain eligibility in the National Flood Insurance Program (NFIP) and, in order to do so, must meet the NFIP regulations found in Title 44 of the Code of Federal Regulations (CFR), Ch. 1, Section 60.3.
- (2) Areas of the city are subject to periodic inundation which could result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.
- (3) Flood losses are caused by the cumulative effect of obstructions in floodplains, causing increases in flood heights and velocities; the cumulative effect of land use changes, resulting in increased runoff; uses in flood hazard areas which are vulnerable to floods; or construction which is inadequately elevated, floodproofed, or otherwise unprotected from flood damages.

SECTION 6. That Section 56-63 of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-63. Definitions.

The following words, terms and phrases, when used in this article, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning. The definitions listed in this section apply exclusively to this article and are intended to provide assistance in the interpretation and enforcement of this article. Unless specifically defined below or elsewhere in this Code, words or phrases used in this article shall be interpreted as to give them the meaning they have in common usage and to give this article its most reasonable application, given its stated purpose and objectives.

100-year flood. See "base flood".

Accessory structure means a subordinate structure to the principal structure on the same lot and, for the purpose of this article, shall conform to the following:

- (1) Accessory structures shall only be used for parking of vehicles and storage.
- (2) Accessory structures shall be designed to have low flood damage potential.
- (3) Accessory structures shall be constructed and placed on the building site so as to offer the minimum resistance to the flow of floodwaters.

- (4) Accessory structures shall be firmly anchored to prevent flotation, collapse and lateral movement, which otherwise may result in damage to other structures.
- (5) Utilities and service facilities such as electrical, heating equipment and duct-work shall be elevated at or above the regulatory flood protection elevation or otherwise protected from intrusion of floodwaters.

Act means the statutes authorizing the NFIP that are incorporated in 42 U.S.C. 4001-4128.

Addition (to an existing building) means any walled and roofed expansion to the perimeter or height of a building. See "horizontal addition" and "vertical addition".

Administrator means the city manager or his designee, who shall be responsible for the implementation and administration of the provisions set forth herein for the special flood hazard area.

Appeal means a request for a review of a local enforcement officer's interpretation of any provision of this article or a request for a variance.

Area of shallow flooding means a designated AO or AH zone on a community's FIRM with one percent or greater annual chance of flooding to an average depth of one to three feet where a clearly defined channel does not exist, where the path of flooding is unpredictable and indeterminate, and where velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

Area of special flood hazard. See "special flood hazard area".

Base flood means the flood having a one percent chance of being equaled or exceeded in any given year. This term is also referred to as the 100-year flood or the one percent annual chance flood.

Basement means any portion of a building having its floor subgrade (below ground level) on all sides.

Buildable area means the area of a lot remaining after the minimum yard requirements for the specific zoning district have been met.

Building means any manmade walled and roofed structure affixed to a permanent site. (See "structure".)

Code of Federal Regulations (CFR) means the codification of the general and permanent rules and regulations published in the Federal Register by the executive departments and agencies of the federal government.

Conditional letter of map revision (CLOMR) means a letter from FEMA commenting on a proposed project that would, upon construction, affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway, the effective Base Flood Elevations (BFEs), or the Special Flood Hazard Area (SFHA). The letter does not revise an effective FIRM; it indicates whether the project, if built as proposed, would meet minimum NFIP standards (see Title 44, Chapter 1, CFR, Parts 60, 65, and 72) and be recognized by FEMA.

Conditional letter of map revision based on fill (CLOMR-F) means a letter from FEMA stating that a parcel of land or proposed structure that will be elevated by fill would not be inundated by the base flood if fill is placed on the parcel as proposed or the structure is built as proposed.

Deck means an above-grade platform attached anywhere other than the front entrance to a building, with or without a roof, which may have supporting columns but must be unenclosed by any walls, windows, glass or screening.

Declaration of Land Restriction (Nonconversion Agreement) means a form provided by the Administrator to be signed and recorded by the owner on the property deed with the Register of Deeds for Williamson County, for the owner to agree not to convert or modify in any manner that is inconsistent with the terms of the building permit and these regulations, enclosures below elevated buildings, attached garages or storage rooms, detached garages, or accessory structures.

Development means any manmade change to improved or unimproved real estate, including, but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavating, drilling operations, or storage of equipment or materials.

Development permit means any permit required for development activities under this Code, or under any other code which has been adopted by the city.

Elevated building means a non-basement building built to have the lowest floor of the lowest enclosed area elevated above the ground level by means of solid foundation perimeter walls with openings sufficient to facilitate the unimpeded movement of floodwater, pilings, columns, piers, or shear walls adequately anchored so as not to impair the structural integrity of the building during a base flood event.

Erosion means the process of the gradual wearing away of land masses. This peril is not "per se" covered under the NFIP.

Exception means a waiver from the provisions of this article which relieves the applicant from the requirements of a rule, regulation, order or other determination made or issued pursuant to this article.

Existing construction means any structure for which the "start of construction" commenced before November 27, 1972 (the effective date of the initial floodplain management code adopted by the city as a basis for participation in the NFIP).

Existing structures. See "existing construction".

FEMA means the Federal Emergency Management Agency of the United States government.

Flood or flooding means:

- (1) General and temporary condition of partial or complete inundation of normally dry land areas from:
 - a. The overflow of inland waters.
 - b. The unusual and rapid accumulation or runoff of surface waters from any source.
 - c. Mudslides (i.e., mudflows) which are proximately caused by flooding as defined in paragraph (1)b. of this definition and are akin to a river of liquid and flowing mud on the surfaces of normally dry land areas, as when earth is carried by a current of water and deposited along the path of the current.
- (2) The collapse or subsidence of land along the shore of a lake or other body of water as a result of erosion or undermining caused by waves or currents of water exceeding anticipated cyclical levels or suddenly caused by an unusually high water level in a natural body of water, accompanied by a severe storm, or by an unanticipated force of nature, such as flash flood, or by some similarly unusual and unforeseeable event which results in flooding as defined in paragraph (1)a. of this definition.

Flood elevation determination means a determination by FEMA of the water surface elevations of the base flood, that is, the flood level that has a one percent or greater chance of occurrence in any given year.

Flood elevation study means an examination, evaluation and determination of flood hazards and, if appropriate, corresponding water surface elevations, or an examination, evaluation and determination of mudslide (i.e., mudflow) or flood-related erosion hazards.

Flood insurance rate map (FIRM) means an official map of a community, issued by FEMA, delineating the areas of special flood hazard or the risk premium zones applicable to the community.

Flood insurance study (FIS) is the official report provided by FEMA, evaluating flood hazards and containing flood profiles and water surface elevation of the base flood.

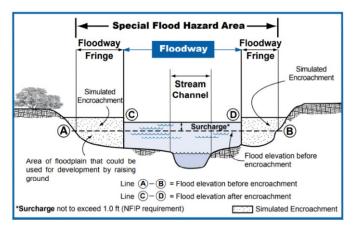

Floodplain or *floodprone area* means any land area susceptible to being inundated by water from any source (see definition of "flood").

Floodplain management means the operation of an overall program of corrective and preventive measures for reducing flood damage, including but not limited to emergency preparedness plans, flood control works and floodplain management regulations.

Flood protection system means those physical structural works for which funds have been authorized, appropriated and expended, and which have been constructed specifically to modify flooding in order to reduce the extent of the special flood hazard area within a community and the depths of associated flooding. Such a system typically includes dams, reservoirs, levees or dikes. These specialized flood modifying works are those constructed in conformance with sound engineering standards.

Floodproofing means any combination of structural and nonstructural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, utility facilities, and structures and their contents.

Floodway means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height of 1 foot. (See Illustration #1.)

Floodway encroachment lines mean the lines marking the limits of floodways on federal, state and local floodplain maps.

Floodway fringe means the area extending from the boundaries of the floodway to the outer boundary of the special flood hazard area, as depicted on a FIRM. (See Illustration #1.)

Freeboard means a factor of safety usually expressed in feet above a flood level for purposes of floodplain management. "Freeboard" tends to compensate for the many unknown factors that could contribute to flood heights greater than the height calculated for a selected size flood and floodway conditions, such as wave action, blockage of bridge or culvert openings, and the hydrological effect of urbanization of the watershed.

Functionally dependent use means a use which cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking facilities, port facilities that are necessary for the loading and unloading of cargo or passengers, and ship building and ship repair facilities, but does not include long-term storage or related manufacturing facilities.

Highest adjacent grade means the highest natural elevation of the ground surface, prior to construction, adjacent to the proposed walls of a structure.

Historic structure means any structure that is:

- Listed individually in the National Register of Historic Places (i.e., a listing maintained by the U.S. Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
- (2) Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary of the Interior to qualify as a registered historic district;
- (3) Individually listed on the Tennessee inventory of historic places and determined as eligible by states with historic preservation programs which have been approved by the Secretary of the Interior; or
- (4) Individually listed on the City of Brentwood or Williamson County, Tennessee inventory of historic places and determined as eligible by communities with historic preservation program that have been certified either:

- a. By the approved Tennessee program as determined by the Secretary of the Interior; or
- b. Directly by the Secretary of the Interior.

Horizontal addition (to an existing building) means any walled and roofed expansion to the perimeter of a building. See "addition" and "vertical addition".

Letter of map amendment (LOMA) is a letter from FEMA officially amending the SFHA shown on the FIRM based on natural high ground that is above the base flood elevation.

Letter of map revision (LOMR) is a letter from FEMA officially revising the effective FIRM and FIS report based on the implementation of physical measures that affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway, the effective BFEs, or the SFHA.

Letter of map revision based on fill (LOMR-F) is FEMA's modification of the SFHA shown on the FIRM based on the placement of fill outside the existing regulatory floodway.

Levee means a manmade structure, usually an earthen embankment, designed and constructed in accordance with sound engineering practices to contain, control or divert the flow of water so as to provide protection from temporary flooding.

Lowest adjacent grade means the lowest natural elevation of the ground surface, prior to construction, adjacent to the proposed walls of a structure.

Lowest floor means the lowest floor of the lowest enclosed area, including a basement. An unfinished or flood resistant enclosure usable solely for parking of vehicles, building access or storage in an area other than a basement area, shall not be considered a building's lowest floor, provided that such enclosure is built in compliance with the applicable non-elevation design requirements of this article.

Manufactured home means a structure, transportable in one or more sections, which is built on a permanent chassis and designed for use with or without a permanent foundation when attached to the required utilities. The term "manufactured home" does not include a "recreational vehicle".

Manufactured home park or subdivision means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

Map means the FIRM for a community issued by FEMA.

Mean sea level means the average height of the sea for all stages of the tide. It is used as a reference for establishing various elevations within the floodplain. For the purposes of this article, the term is synonymous with the North American Vertical Datum of 1988 (NAVD or NAVD88), to which base flood elevations shown on the city's FIRM are referenced.

National Flood Insurance Program (NFIP) means the National Flood Insurance Program authorized by 42 U.S.C. 4001-4128.

National Geodetic Vertical Datum of 1929 (NGVD or NGVD29) means a vertical control used as a reference for establishing varying elevations within the floodplain.

New construction means any structure for which the "start of construction" commenced on or after November 27, 1972 and includes any subsequent improvements to such structure.

New manufactured home park or subdivision means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final

site grading or the pouring of concrete pads) is completed on or after the effective date of November 27, 1972, or the date the property was first included within a special flood hazard area, whichever occurred later, and includes any subsequent improvements to such structures.

Nonsubstantial improvement means any reconstruction, rehabilitation, addition, alteration or other improvement of a structure in which the cost is less than fifty percent (50%) of the market value of the structure before the "start of construction" of the initial improvement, which is not deemed a "substantial improvement," as defined herein.

North American Vertical Datum of 1988 (NAVD or NAVD88) means a vertical control used as a reference for establishing varying elevations within the floodplain.

Person includes any individual or group of individuals, corporation, partnership, association, or any other entity, including state and local governments and agencies.

Porch means an above-grade platform attached at the front entrance to a building, with or without a roof, which may have supporting columns but must be unenclosed by walls, windows, glass or screening.

Reasonably safe from flooding means base floodwaters will not inundate the land or damage structures to be removed from the special flood hazard area and that any subsurface waters related to the base flood will not damage existing or proposed structures.

Recreational vehicle means a vehicle which is:

- (1) Built on a single chassis;
- (2) Four hundred square feet or less when measured at the largest horizontal projection;
- (3) Designed to be self-propelled or permanently towable by a light duty truck; and
- (4) Designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.

Regulatory flood protection elevation means the "base flood elevation (BFE)" plus the "freeboard". In "special flood hazard areas" this elevation shall be the BFE plus three feet.

Regulatory floodway. See "floodway".

Riverine means relating to, formed by, or resembling a river (including tributaries), stream, brook, etc.

Special flood hazard area (SFHA) is the land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year. The area may be designated on the FIRM as zones A, AO, AH, AE or A99.

Special hazard area means an area having special flood, mudslide (i.e., mudflow), or flood-related erosion hazards, and shown on a FIRM as zone A, AO, AH, AE, AR, AR/AE, AR/AO, AR/AH, AR/A, A99, VO, VE, V, M, or E.

Start of construction includes substantial improvement, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure (including a manufactured home) on a site, such as the pouring of slabs or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; and includes the placement of a manufactured home on a

foundation. Permanent construction does not include initial land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds, not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

State coordinating agency means the Tennessee Emergency Management Agency, as designated by the governor of the State of Tennessee at the request of FEMA to assist in the implementation of the NFIP for the state.

Structure, for purposes of the floodplain management provisions of this article, means a walled and roofed building, a manufactured home, or a gas or liquid storage tank that is principally above ground.

Substantial damage means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before-damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

Substantial improvement means any reconstruction, rehabilitation, addition, alteration or other improvement of a structure, taking place during a five-year period, in which the cumulative cost equals or exceeds 50 percent of the market value of the structure before the "start of construction" of the initial improvement. This term includes structures which have incurred "substantial damage," regardless of the actual repair work performed. The market value of the structure should be the value of the structure prior to the start of the initial improvement, or in the case of substantial damage, the value of the structure prior to the damage occurring. The market value can be based on: an appraisal of market value prepared within the previous 12 months by a Tennessee licensed real estate appraiser, 110% of the latest Market Appraisal Improvement Value determined by the Williamson County Property Assessor's Office, or an assessment of the structure's actual cash value (including depreciation) prepared within the previous 12 months. The term does not, however, include either:

- Any project for improvement of a structure to correct existing violations of state or local health, sanitary, or safety code specifications which have been pre-identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions and not solely triggered by an improvement or repair project; or
- (2) Any alteration of a "historic structure", provided that the alteration will not preclude the structure's continued designation as a "historic structure".

Variance is a grant of relief from the requirements of this article.

Vertical addition (to an existing building) means any walled and roofed expansion to the height of a building. See "addition and "horizontal addition".

Violation means the failure of a structure or other development to be fully compliant with the regulations set forth in this article. A structure or other development without the elevation certificate, other certification, or other evidence of compliance required in this article is presumed to be in violation until such time as that documentation is provided.

Water surface elevation means the height, in relation to the North American Vertical Datum of 1988 (NAVD88), of floods of various magnitudes and frequencies in the floodplains of riverine areas.

SECTION 7. That Section 56-64 of Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-64. Special flood hazard areas.

The special flood hazard areas for the city, as identified by FEMA, and in its FIS dated February 26, 2021 and FIRM Panel Numbers 47187C0086F, 47187C0087F, 47187C0088F, 47187C0089F, 47187C0204F, 47187C0205F, 47187C0206F, 47187C0207F, 47187C0208F, 47187C0209F, 47187C0220F and 47187C0240F, dated September 29, 2006, Panel Numbers 47187C0093G and 47187C0094G dated December 22, 2016, and Panel Numbers 47187C0115G, 47187C0230G, and 47187C0235G, dated February 26, 2021, along with all supporting technical data and any revisions by LOMRs approved by FEMA, are adopted by reference and declared to be a part of this article.

SECTION 8. That Section 56-70 of Chapter 56, Article II, Division 3, of the Code of Ordinances of the City of Brentwood shall be amended to read as follows:

Sec. 56-70. Penalties for violation.

- (a) Any person who violates the provisions of this article or fails to comply with any of its requirements, including any conditions and safeguards established in connection with grants of variance, shall be subject to punishment as provided in section 1-9 of this Code. In addition, any person who violates this article or fails to comply with any of its requirements shall pay all costs and expenses involved in the case. Each day any such violation continues shall be considered a separate offense. Nothing herein contained shall prevent the city from taking such other lawful actions to prevent or remedy any violation.
- (b) Any structure or development without certification or other evidence of compliance required in this article is presumed to be in violation until such time as the required documentation is provided. Any structure or development for which the city's approval is required shall be in violation of this article if such approval is not obtained prior to the commencement of construction or development.

SECTION 9. That Section 56-77 of Chapter 56, Article II, Division 4, of the Code of Ordinances of the City of Brentwood shall be amended to read as follows:

Sec. 56-77. Duties and responsibilities of the administrator.

Duties of the administrator shall include, but not be limited to, the following:

- (1) Review all development permits to assure that the permit requirements of this article have been satisfied, and that proposed building sites will be reasonably safe from flooding.
- (2) Review all proposed development to assure that all necessary permits have been received from those governmental agencies from which approval is required by federal or state law, including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334.

- (3) Notify adjacent communities and the Tennessee Emergency Management Agency State NFIP Office prior to any alteration or relocation of a watercourse and submit evidence of such notification to FEMA.
- (4) For any altered or relocated watercourse, assure that engineering data/analysis are submitted within six months to FEMA to ensure accuracy of community FIRMs through the LOMR process.
- (5) Assure that the flood carrying capacity within an altered or relocated portion of any watercourse is maintained.
- (6) Record the elevation, in relation to NAVD88, or height above the highest adjacent grade, where applicable, of the lowest floor (including basement) of all new and substantially improved buildings, in accordance with section 56-78.
- (7) Where interpretation is needed as to the exact location of boundaries of the special flood hazard area (e.g., where there appears to be a conflict between a mapped boundary and actual field conditions), make the necessary interpretation. Any person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in this article.
- (8) When base flood elevation data and floodway data have not been provided by FEMA, including areas designated zone A on the community's FIRM, require development permit applicants to provide certification of base flood elevation and floodway data by a Tennessee licensed professional engineer, to assure that new construction, substantial improvements, or other development in special flood hazard areas on the city's FIRM meet the requirements of this article.
- (9) Maintain all records pertaining to the provisions of this article in the office of the administrator and provide for such records to be open for public inspection. Permits issued under the provisions of this article shall be maintained in a separate file or marked for expedited retrieval within combined files.
- (10) A final finished construction elevation certificate (FEMA Form 086-0-33, or most current version thereof) is required after construction is completed and prior to certificate of compliance/occupancy issuance. It shall be the duty of the permit holder to submit to the floodplain administrator a certification of final as-built construction of the elevation of the reference level and all attendant utilities. The floodplain administrator shall review the certification data submitted. Deficiencies detected by such review shall be corrected by the permit holder immediately and prior to certificate of compliance/occupancy issuance. In some instances, another certification or failure to make required corrections shall be cause to withhold the issuance of a certificate of compliance/occupancy. The finished construction elevation certificate certificate.

SECTION 10. That Section 56-78 of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-78. Permit procedures.

- (a) Application for a development permit shall be made to the administrator on forms furnished by the city prior to any development activities within a special flood hazard area. The development permit application requirements shall include, but are not limited to, the following: plans in duplicate drawn to scale and prepared by a Tennessee licensed land surveyor or professional engineer, showing the nature, location, dimensions, and elevations of the area in question, existing or proposed structures, earthen fill placement, storage of materials or equipment, and drainage facilities. The requirements herein shall be in addition to any and all requirements for development permits that may be imposed pursuant to other provisions of this Code. The following information is specifically required for permits for development within special flood hazard areas:
 - (1) Application stage.
 - a. Proposed elevation in relation to NAVD88, or height above the highest adjacent grade, where applicable, of the proposed lowest floor, including basement, of all buildings where base flood elevations are available.
 - b. Description of the extent to which any watercourse will be altered or relocated as a result of proposed development. For projects proposing to alter or relocate a portion of a watercourse, the application must include:
 - 1. Notification of adjacent communities and the Tennessee Emergency Management Agency State NFIP Office of the extent of the proposed alteration or relocation of the watercourse.
 - 2. Hydrologic and hydraulic analyses performed in accordance with standard engineering practices demonstrating that:
 - (i) The flood carrying capacity within any altered or relocated portion of the watercourse is maintained.
 - (ii) The cumulative effect of the proposed alteration or relocation within the floodway, including floodways established per subsection (a)(1)c. of this section, shall not result in any increase (0.00') in the water surface elevation of the base flood during the occurrence of a base flood discharge at any point within the city.
 - (iii)These analyses shall be certified by a Tennessee licensed professional engineer, and include all supporting technical data and certification that the requirements of this subsection have been met, using the same methodologies as in 44 CFR 60.3(d)(3).
 - 3. In lieu of meeting the requirements of subsection (a)(1)b.2(ii) of this section, a CLOMR submitted in accordance with 44 CFR 60.3(d)(4) and 65.12, and approved by FEMA, provided that:
 - (i) The administrator shall be satisfied that the impacts demonstrated by hydrologic and hydraulic analyses performed in accordance with standard engineering practices, and certified by a Tennessee licensed professional engineer, do not adversely impact adjacent properties.
 - (ii) The complete CLOMR application is reviewed and approved by the administrator prior to submittal to FEMA.
 - (iii)All subsequent data submitted to FEMA, prior to approval of the CLOMR by FEMA, is submitted to the administrator.

- c. For any location within a special flood hazard area where base flood elevation data is not initially available, including areas designated zone A on the community's FIRM, or where the floodway has not been delineated, a Tennessee licensed professional engineer shall determine the base flood elevation and establish the limits of the regulatory floodway. The engineer's certification shall be submitted with the permit application.
- d. In order to determine if improvements or damage meet the substantial improvement or substantial damage criteria, the applicant shall provide to the floodplain administrator a detailed cost to repair all damages and/or cost of improvements which includes the complete costs associated with all types of work necessary to completely repair or improve a building. These include the costs of all materials, labor, and other items necessary to perform the proposed work. These must be in the form of:
 - 1. An itemized cost of materials and labor, or estimates of materials and labor, that are prepared by licensed contractors or professional construction cost estimators.
 - 2. Building valuation tables published by building code organizations and cost-estimating manuals and tools available from professional building cost-estimating services.
 - 3. A qualified estimate of costs that is prepared by the local official using professional judgement and knowledge of local and regional construction costs.
 - 4. A detailed cost estimate provided and prepared by the building owner. This must include as much supporting documentation as possible (e.g., pricing information from lumber companies, plumbing and electrical suppliers, etc.). In addition, the estimate must include the value of labor, including the value of the owner's labor.
- e. For projects proposing to enclose areas below elevated buildings, construct an attached garage or storage room, or construct a detached garage or accessory structure, include signed Declaration of Land Restriction (Nonconversion Agreement); the agreement shall be recorded by the owner on the property deed prior to certificate of compliance/occupancy issuance.
- (2) *Construction stage.*
 - a. Elevation of the lowest floor relative to NAVD88, as determined by or under the direct supervision of a Tennessee licensed land surveyor and certified by a Tennessee licensed land surveyor, to be provided upon completion of the foundation. Should the elevation of the lowest floor be lower than the proposed elevation on the approved permit, construction shall be discontinued until corrective action has been taken or the administrator is otherwise satisfied that the lowest floor elevation will comply with the provisions of this article. The administrator shall record the elevation of the lowest floor on the development permit.
 - b. For all new construction and substantial improvements, the permit holder shall provide to the administrator a final finished construction elevation certificate (FEMA Form 086-033). A final finished construction elevation certificate is required after construction is completed and prior to certificate of compliance/occupancy issuance. It shall be the duty of the permit holder to submit to the floodplain administrator a certification of final as-built construction of the elevation of the reference level and all attendant utilities. The administrator will keep the certificate on file in perpetuity.
 - c. Where filling has been permitted for a new subdivision, a post-construction LOMR-F shall be submitted to the administrator after construction is complete. The final plat shall not be recorded until the administrator receives a copy of the LOMR-F as approved by FEMA. In lieu of a LOMR-F, a copy of a LOMR, as approved by FEMA, may be provided.

- d. For all projects altering or relocating a watercourse, a post-construction LOMR shall be submitted to the administrator after construction is complete, per section 56-77(4) and in accordance with 44 CFR 65.3. A portion of the performance security instrument held by the city for a subdivision or other new development shall be maintained, in an amount to be determined by the administrator, until the administrator receives a copy of the LOMR as approved by FEMA.
- (b) Any work undertaken prior to submission of any required engineer's certification shall be at the permit holder's risk. The administrator shall review the above-referenced certification data. Deficiencies detected by such review shall be corrected by the permit holder immediately and prior to further work being allowed to proceed. Failure to submit the certification or failure to make said corrections required hereby shall be cause to issue a stop-work order for the project.

SECTION 11. That Section 56-81 of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-81. General standards.

In all special flood hazard areas, the following provisions are required:

- (1) New construction and substantial improvements shall be anchored to prevent flotation, collapse and lateral movement of the structure.
- (2) Manufactured homes shall be installed using methods and practices that minimize flood damage. They must be elevated and anchored to prevent flotation, collapse and lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable state and local anchoring requirements for resisting wind forces.
- (3) New construction and substantial improvements shall be constructed with materials and utility equipment resistant to flood damage.
- (4) New construction and substantial improvements shall be constructed by methods and practices that minimize flood damage.
- (5) All electrical, heating, duct-work, ventilation, plumbing, air conditioning equipment and other service facilities shall be elevated at or above the regulatory flood protection elevation. Where underground service or feeder conductors are supplied to the structure, a conduit(s) for the main service from the ground to the structure is permitted so long as it is water-tight and extends continuously from the ground to a point above the regulatory flood protection elevation.
- (6) New and replacement water supply systems shall be designed to minimize or eliminate infiltration of floodwaters into the system.
- (7) New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of floodwaters into the systems and discharges from the systems into floodwaters.
- (8) On-site waste disposal systems shall be located and constructed to avoid impairment to them or contamination from them during flooding.

- (9) Any alteration, repair, reconstruction or improvements to a building that is in compliance with the provisions of this article shall meet the requirements of "new construction" as contained in this article.
- (10) Any alteration, repair, reconstruction or improvements to a building that is not in compliance with the provisions of this article shall be undertaken only if said nonconformity is not further extended or replaced.
- (11) All new construction and substantial improvement proposals shall include and provide copies of all necessary federal and state permits, including Section 404 of the Federal Water Pollution Control Act amendments of 1972, 33 U.S.C. 1334.
- (12) All subdivision proposals and other proposed new development proposals shall meet the standards of section 56-82.
- (13) When proposed new construction and substantial improvements are partially located in a special flood hazard area, the entire structure shall meet the standards for new construction in a special flood hazard area.
- (14) When new construction and substantial improvements are proposed for a location that lies in multiple special flood hazard area zones or in a special flood hazard area zone with multiple base flood elevations, the entire structure shall meet the standards for the most hazardous special flood hazard area zone and the highest base flood elevation.
- (15) Proposals for new construction, substantial improvements, subdivisions and other new developments, including manufactured home parks, shall be reviewed to determine whether such proposals will be reasonably safe from flooding and that compliance with the above provisions of this section will be achieved. All such proposals shall meet the following standards:
 - a. Each proposal shall be consistent with the need to minimize flood damage.
 - b. Each proposal shall have public utilities and facilities, such as sewer, gas, electrical and water systems, located and constructed to minimize or eliminate flood damage.
 - c. Each proposal shall have adequate drainage provided to reduce exposure to flood hazards.
 - d. Each proposal shall include base flood elevation data. (See section 56-78.)
 - e. Subdivision proposals shall not contain special flood hazard areas within the buildable area of the lots.
- (16) The final plat shall not be recorded until the administrator receives a copy of the LOMR-F, as approved by FEMA, where required by section 56 78(a)2.
- (17) A portion of the performance security instrument held by the city for a subdivision or other new development shall be maintained, in an amount to be determined by the administrator, until the administrator receives a copy of the LOMR as approved by FEMA, where required by section 56-78(a)2.
- (18) All elevation requirements required of this article must be certified by a Tennessee licensed land surveyor. The certification must be on the most current FEMA elevation certificate.
- (19) All floodproofing requirements required of this article must be certified by a Tennessee licensed professional engineer or architect. The certification must be on the most current FEMA floodproofing certificate.

SECTION 12. That Section 56-82 of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-82. Specific standards for areas other than the floodway.

In all special flood hazard areas other than the floodway, the following provisions, in addition to those set forth in section 56-81, shall apply:

- (1) Residential or nonresidential buildings.
 - a. In areas where base flood elevation data is available, new construction and substantial improvement of any nonresidential (including commercial, industrial and institutional) or residential building (or manufactured home), or horizontal addition to such buildings, may be permitted, provided that the lowest floor, including basement, shall be elevated to no lower than three feet above the base flood elevation.

Exception: For any nonresidential (including commercial, industrial and institutional) or residential building (or manufactured home) which was permitted as new construction or substantial improvement after January 16, 2003, but prior to [ordinance adoption date], and for which it is demonstrated that the lowest floor, including basement, is no lower than two feet above the base flood elevation, substantial improvement may be permitted without requiring the lowest floor, including basement, be elevated to no lower than three feet above the base flood elevation.

Solid foundation perimeter walls or piers may be used to elevate a structure, provided that:

- 1. Openings sufficient to facilitate equalization of flood hydrostatic forces on both sides of exterior walls shall be provided in accordance with subsection (2) of this section.
- 2. The minimum number of piers necessary to structurally support the building shall be used, and piers shall be designed to provide the least resistance to the flow of water.
- 3. In no event shall the elevated height of any residential building exceed 52 feet as measured from the highest point of the roof to the lowest adjacent grade.
- b. Within special flood hazard areas where base flood elevations have not been established, or where no floodways have been designated, no construction may be permitted until a Tennessee licensed professional engineer has determined the base flood elevation and established the limits of the regulatory floodway. Once the base flood elevation and floodway location have been established in accordance with standard engineering practices, construction shall comply with the building elevation requirements set forth in subsection (1)a. of this section.
- (2) *Enclosures below the lowest floor.* All new construction and substantial improvements that include fully or partially enclosed areas formed by foundation and walls below the lowest floor shall be designed to allow for the entry and exit of floodwaters to automatically equalize hydrostatic flood forces on exterior walls.
 - a. Designs for complying with this requirement must either be certified by a Tennessee licensed professional engineer or architect or meet or exceed the following minimum criteria:
 - 1. A minimum of two openings shall be provided, on at least two exterior walls, having a total net open area of not less than one square inch for every square foot of enclosed area subject to flooding.

- 2. The bottom of all openings shall be no higher than one foot above the higher of the exterior or interior finished grade or floor immediately below the opening.
- 3. Openings may be equipped with screens, louvers, valves or other coverings or devices, provided they permit the automatic flow of floodwaters in both directions.
- b. A Declaration of Land Restriction (Nonconversion Agreement) shall be recorded by the property owner for enclosed areas that exceed four feet in height, measured from the lowest adjacent grade to the top of lowest floor.
- c. The interior portion of such enclosed area may be used solely for parking, building access or storage, but shall not be finished or partitioned into separate rooms in such a way as to impede the movement of floodwaters. Any partitions shall comply with the provisions of this section.
- (3) Garages, storage rooms, and accessory buildings. Attached garages, attached storage rooms, and accessory buildings (including detached garages), whose floor is less than the regulatory flood protection elevation, shall be designed to allow for the entry and exit of floodwaters to automatically equalize hydrostatic flood forces on exterior walls.
 - a. Designs for complying with this requirement shall comply with the requirements set forth in subsection (2)a. of this section.
 - b. A Declaration of Land Restriction (Nonconversion Agreement) shall be recorded by the property owner for any enclosed area in excess of 200 sq. ft.
 - c. The interior portion of such enclosed area shall comply with the requirements set forth in subsection (2)c. of this section.
 - d. Accessory buildings (including detached garages) shall also comply with the requirements set forth in Sec. 78-22. Any livable space, as permitted by Sec. 78-22, shall comply with the requirements set forth in subsection (1) of this section.
- (4) Standards for manufactured homes and recreational vehicles.
 - a. All manufactured homes must meet all the requirements for new construction, whether placed or substantially improved:
 - 1. On individual lots or parcels; or
 - 2. In new, substantially improved, existing, and expansions to existing manufactured home parks or subdivisions.
 - b. All manufactured homes placed or substantially improved on an individual lot or parcel or in a manufactured home park or subdivision must be elevated so that the lowest floor of the manufactured home lies on a permanent foundation no lower than three feet above the base flood elevation or three feet above the highest adjacent grade, whichever is higher. Exception: For any manufactured home which was permitted as new construction or substantial improvement after January 16, 2003, but prior to [ordinance adoption date], and for which it is demonstrated that the lowest floor lies on a permanent foundation no lower than two feet above the base flood elevation, substantial improvement may be permitted without requiring the lowest floor be elevated to no lower than three feet above the base flood elevation or three feet above the highest adjacent grade.
 - c. Any manufactured home which has incurred "substantial damage" as the result of a flood must meet the standards of this division.
 - d. All manufactured homes must be securely anchored to an adequately anchored foundation system to resist flotation, collapse and lateral movement.
 - e. All recreational vehicles placed in an identified special flood hazard area must either:

- 1. Be on the site for fewer than 180 consecutive days;
- 2. Be fully licensed and ready for highway use (a recreational vehicle is ready for highway use if it is licensed, on its wheels or jacking system, attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached structures or additions); or
- 3. Meet all requirements for new construction.

(5) *Compensatory cut and fill.*

- a. Engineered fill may be permitted at locations outside the floodway. The volume of material shall be based upon an equal cut/fill quantity, so that the total amount of fill material added shall equal the amount of material removed. The location of the cut must be hydraulically connected to the location of the fill, and the location of the cut must have a base flood elevation no lower than the base flood elevation of the location of the fill, unless hydrologic and hydraulic analyses performed in accordance with standard engineering practices and certified by a Tennessee licensed professional engineer is provided, demonstrating that an alternate location of the cut will not result in any increase (0.00') in the water surface elevation of the base flood during the occurrence of a base flood discharge at any point within the city. For lots governed by the Subdivision Regulations of the City of Brentwood, the building pad for each affected lot shall be filled to an elevation that equals or exceeds the regulatory flood protection elevation at that location. Approval for filling may be granted only if the administrator determines that the fill material will not unduly increase flood damage potential, and that the amount and dimensions of fill material in any location is not greater than is necessary to achieve the purpose of the fill as demonstrated in the plan submitted by the applicant.
- b. In granting approval to fill property within the special flood hazard area, the administrator shall require that measures be taken against erosion through the use of rip-rap, vegetative cover, bulk heading, or other suitable means.
- c. Where filling has been permitted on a platted lot, an as-built survey showing compliance with this division must be submitted to the administrator before a building permit will be issued
- d. Where filling has been permitted for a new subdivision, an as-built survey showing compliance with this division must be submitted to the administrator before the final plat is recorded. A copy of the LOMR-F, as required by subsection 56-78(a)(2)c, as approved by FEMA, must be submitted to the administrator before the final plat is recorded.
- (6) *Private utility facilities.* In lieu of elevation, private utility facilities, including heating and air conditioning equipment and pool equipment, may be floodproofed and located and designed so as to minimize or eliminate flood damage. The administrator shall require certification by a Tennessee licensed professional engineer or architect that the floodproofing, location and/or design of the utility facilities are in accordance with accepted standards of practice for meeting the provisions of this article.
- (7) *Fences.* With the approval of the administrator, fences may be erected at any location within the special flood hazard area other than the floodway, provided that the fence is an open fence in compliance with Sec. 78-10 and the administrator shall be satisfied that the fence is designed so as not to interfere with the flow of floodwaters.

SECTION 13. That Section 56-83 of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-83. Special standards for floodways.

Located within the special flood hazard areas established in section 56-64 are areas designated as floodways. A floodway may be an extremely hazardous area due to the velocity of floodwaters, debris or erosion potential. In addition, the area must remain free of encroachment in order to allow for the discharge of the base flood without increased flood heights and velocities. Therefore, the following provisions shall apply in addition to general standards set forth in this article:

- (1) Except as otherwise permitted in subsections (2), (3), (4), (5), (6), and (7) below, encroachments are prohibited within the floodway, including: earthen fill material, new construction, substantial improvements, decks or above-grade patios outside the existing building footprint, manufactured homes or recreational vehicles, and any other development.
- (2) Fences may be permitted, provided that:
 - a. The lot is three or more acres in size and is being utilized for an agricultural use related to animal husbandry,
 - b. The fence is an open fence in compliance with Sec. 78-10,
 - c. It is demonstrated through hydrologic and hydraulic analyses performed in accordance with standard engineering practices that the cumulative effect of the proposed fence encroachments shall not result in any increase (0.00') in the water surface elevation of the base flood, velocities or floodway widths during the occurrence of a base flood discharge at any point within the city. The property owner shall submit certification from a Tennessee licensed professional engineer that the requirements of this subsection have been met, along with supporting technical data, using the same methodologies as in 44 CFR 60.3(d)(3),
 - d. When substantial repair (greater than 50 percent rebuilding) of any existing fence not conforming to the provisions of this section and Sec. 78-10 is needed, including fences partially within the floodway, the portion of the existing fence within the floodway shall be completely removed and not replaced, and
 - e. The fences shall be completely removed within one year of the lot no longer being utilized for an agricultural use related to animal husbandry.
- (3) The elevation of an existing building shall be permitted, provided that:
 - a. The building, including additions or above-grade patios, shall be limited to the existing footprint,
 - b. The building shall comply with the requirements set forth in section 56-82(1) and (2),
 - c. The height of any perimeter wall used to elevate a building shall not exceed four feet, measured from the lowest adjacent grade to the top of lowest floor,
 - d. The minimum number of piers necessary to structurally support the building shall be used, and piers shall be designed to provide the least resistance to the flow of water,
 - e. When the height of the building is elevated greater than four feet, measured from the lowest adjacent grade to the top of lowest floor, a single front wall façade with flood vents may be added in conjunction with piers used to support the structure. The number, size and location of vents must be approved by the administrator. The sides and rear of the structure may not be enclosed, and the building must be supported by the minimum number of piers to support

the structure. For the purpose of this section, the front of the structure will be the elevation facing the street and parallel to the front building setback line, and

- f. It is demonstrated through hydrologic and hydraulic analysis performed in accordance with standard engineering practices that the cumulative effect shall not result in any increase (0.00') to the water surface elevation of the base flood, velocities or floodway widths during the occurrence of a base flood discharge at any point within the community. Certification thereof by a Tennessee licensed professional engineer, along with supporting technical data, shall be provided to the administrator before construction or placement may be initiated.
- (4) For an elevated building that complies with the requirements set forth in subsection (3) of this section, a deck that has its finished floor at least three feet above the 100-year flood elevation may be allowed. Any deck permitted pursuant to this subsection shall not have a roof and must be attached to the building and located in the rear buildable area of the lot. For a building with an existing outdoor roofed area, the existing roof may remain, provided the roof is completely connected to the building and is elevated with the building, as-is. The existing roof may cover any deck permitted pursuant to this subsection, provided that it includes a signed Declaration of Land Restriction (Nonconversion Agreement); the agreement shall be recorded by the property owner on the property deed prior to certificate of compliance/occupancy issuance. For existing roofs not located in the rear buildable area of the lot, a deck may be permitted outside of the rear buildable area, provided the deck is within the footprint of the existing roof only. Safety railings no taller than 48 inches are allowed on top of the surface perimeter of the deck. Such permitted deck may only have the minimum ingress and egress to comply with the adopted building code. The deck must be open underneath, and the minimum number of piers or columns necessary to structurally support the deck shall be used. The piers or columns shall be designed to provide the least resistance to the flow of water. The support system for the deck must be designed by a Tennessee licensed professional engineer. For any deck with ground supports, landings, or stairs that touch the ground or extend below the 100-year flood elevation, a no-rise (0.00') certification must be provided by a Tennessee licensed professional engineer. All other jurisdictional permits, design and placement requirements per the adopted building and municipal codes apply.
- (5) For an elevated building that complies with the requirements set forth in subsection (3) of this section, a porch that has its finished floor at least three feet above the 100-year flood elevation may be allowed. Any porch permitted pursuant to this subsection must be attached at the front entrance to the building and located in the front buildable area of the lot. Safety railings no taller than 48 inches are allowed on top of the surface perimeter of the porch. Such permitted porch shall have a maximum footprint area equivalent to twenty-five percent (25%) of the front façade length of the home and eight (8) feet beyond the average front plane of the house. Stairs leading to such porch may not be larger than six (6) feet wide and one (1) foot deep; however, intermediate landings connecting two or more flights of straight stairs may be allowed provided they are no larger than 36 square feet. The porch, landing, and stairs must be open underneath, and the minimum number of piers or columns necessary to structurally support the porch, landing, and stairs shall be used. A front wall façade may be added but the sides must remain open. For the purposes of this subsection, the front of the porch, landing, and stairs will be deemed to be the elevation facing the street and parallel to the front building setback line. A no-rise (0.00') certification must be provided by a Tennessee licensed professional engineer. All other jurisdictional permits, design and placement requirements per the adopted building and municipal codes apply. Existing porches and landings that are larger

than the limitations provided herein can remain when a building is elevated, but they cannot be enlarged.

- (6) Nonsubstantial vertical additions to existing dwellings and nonsubstantial interior renovations within the existing building footprint may be permitted.
- (7) The construction or placement of certain structures, facilities and improvements identified below may be permitted by the administrator. Except where otherwise permitted by subsection 56-78(a)(1)b, such structures, facilities and improvements shall only be permitted if it is demonstrated through hydrologic and hydraulic analysis performed in accordance with standard engineering practices that their cumulative effect shall not result in any increase (0.00') to the water surface elevation of the base flood, velocities or floodway widths during the occurrence of a base flood discharge at any point within the community. Certification thereof by a Tennessee licensed professional engineer, along with supporting technical data, shall be provided to the administrator before construction or placement may be initiated. Structures, facilities and improvements permitted under these provisions shall be limited to:
 - a. Roads, sidewalks, bicycle/pedestrian paths and associated signs.
 - b. Drainage structures, including but not limited to bridges and culverts.
 - c. Other public infrastructure needs, including public utilities.
 - d. Parks and recreational facilities, including but not limited to open shelters, basketball courts and athletic fields.
 - e. Driveways and parking areas.

SECTION 14. That Section 56-86 of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-86. Standards for unmapped streams.

Located within the city are unmapped streams where special flood hazard areas are neither indicated nor identified. Adjacent to such streams, the following provisions shall apply:

- (1) No encroachments, including fill material, structures, or other development, shall be located within an area of at least twice the width of the stream, measured from the top of each stream bank, unless hydrologic and hydraulic analyses performed in accordance with standard engineering practices and certified by a Tennessee licensed professional engineer is provided, demonstrating that the cumulative effect of the proposed development will not result in any increase (0.00') in the water surface elevation of the base flood during the occurrence of a base flood discharge at any point within the city.
- (2) If the stream and the adjacent area are subsequently identified as a special flood hazard area, all development, including new construction and substantial improvements, shall meet the standards established in accordance with divisions 4 and 5 of this article.

SECTION 15. That Section 56-87 of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-87. Requirements for shallow flooding areas (Zone AO).

Located within the special flood hazard areas established in division 3, section 56-64, are areas designated as shallow flooding areas. These areas, designated zone AO on the community's FIRM, have special flood hazards associated with base flood depths of one to three feet where a clearly defined channel does not exist and where the path of flooding is unpredictable and indeterminate. In addition to the requirements of division 5, sections 56-81, 56-82 and 56-83, all new construction, and substantial improvements shall meet the following requirements:

- (1) The lowest floor (including basement) shall be elevated at least as high as the depth number specified on the FIRM, in feet, plus a freeboard of three feet above the highest adjacent grade; or at least five feet above the highest adjacent grade, if no depth number is specified.
- (2) Adequate drainage paths shall be provided around structures on slopes, to guide floodwaters around and away from proposed structures.

SECTION 16. That Section 56-88 of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-88. Requirements for shallow flooding areas (Zone AH).

Located within the special flood hazard areas established in division 3, section 56-64, are areas designated as shallow flooding areas. These areas, designated zone AH on the community's FIRM, are subject to inundation by one-percent-annual-chance shallow flooding (usually areas of ponding) where average depths are one to three feet. Base flood elevations derived from detailed hydraulic analyses are shown in this zone. In addition to meeting the requirements of division 5, sections 56-81, 56-82 and 56-83, all new construction and substantial improvements shall meet the following requirements:

(1) Adequate drainage paths shall be provided around structures on slopes, to guide floodwaters around and away from proposed structures.

SECTION 17. That Section 56-89 of the Code of Ordinances of the City of Brentwood, Tennessee is hereby amended to read as follows:

Sec. 56-89. Standards for areas protected by flood protection system (A-99 Zones).

Located within the special flood hazard areas established in division 3, section 56-64, are areas designated as protected by a flood protection system but where base flood elevations have not been determined. These areas, designated zone A-99 on the community's FIRM, shall meet the requirements and standards established in accordance with divisions 4 and 5 of this article.

SECTION 18. If any section, subsection, clause, provision or portion of this ordinance is held to be invalid or unconstitutional by any court of competent jurisdiction, such holding shall not affect any other section, subsection, clause, provision or portion of this ordinance.

SECTION 19. That this ordinance shall take effect from and after its final passage and publication thereof, or fifteen days after its first passage, whichever occurs later, the general welfare of the City of Brentwood, Williamson County, Tennessee, requiring it.

Chapter 56 STORMWATER MANAGEMENT, EROSION CONTROL AND FLOOD DAMAGE PREVENTION

ARTICLE I. STORMWATER MANAGEMENT AND EROSION CONTROL

DIVISION 1. IN GENERAL

Sec. 56-1. Intent; application.

- (a) Land disturbances and stormwater can contribute to the degradation of land surfaces and streams, erosion, siltation, earth slides, mud flows, dusty conditions, clogged storm sewers, additional road maintenance cost, increased water runoff and localized flooding. It is the intent of this chapter to protect the health and safety of residents and to preserve adjoining or nearby properties, including hilltops, hillsides, waterways, vegetation, structures and other natural and manmade features, through the regulation of land disturbances and stormwater runoff and the imposition of erosion control and stormwater management measures.
- (b) Except as otherwise provided for, the following regulations shall apply to all properties throughout the city.

(Ord. No. 2008-02, § 1, 3-24-2008)

Sec. 56-2. Definitions.

The following words, terms and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

Best Management Practices Manual means a manual approved for use by the city's engineering director to provide examples of structural or non-structural practices intended to address water quantity or quality. The Best Management Practices Manual is intended to be utilized by design professionals and/or construction personnel in the course of development and construction activities within the city.

Channel means the portion of a natural stream which conveys normal flows of water.

Combined sewer means a sewer which conveys both sanitary sewage and stormwater.

Construction activities means activities which include but are not limited to clearing and grubbing, grading, excavating and demolition.

Cut means the portion of land surface or area from which earth has been or will be removed by excavation; also, the depth below original ground surface to excavated surface.

Disturbed area means an area of land subjected to erosion due to the removal of vegetative cover and/or earthmoving activities, including filling.

Drainage means the interception and removal of groundwater or surface water by natural or artificial means.

EPA means the United States Environmental Protection Agency.

Erosion means any removal or loss of soil by the action of wind and water. Erosion includes both the detachment and transportation of soil particles.

Erosion control measures means one or more of the following measures, or other methods of slowing or stopping the removal of soil by wind, water, or gravity used singularly or in combination as appropriate:

- (1) *Diversion:* A swale or channel with supporting ridge (berm, dike or wall) constructed across a sloping land surface along the contour, or with predetermined grades, to intercept and divert surface runoff before it gains sufficient volume or velocity to create conditions of erosion.
- (2) *Drains:* Underground conduits or filter drains to reduce surface runoff or lower a high-water table.
- (3) *Grade stabilization structures:* Drop structures made of concrete, corrugated metal pipe or other suitable materials which dissipate the energy of flowing water by dropping it in a relatively short horizontal distance.
- (4) *Grassed waterways:* A natural or constructed waterway, usually broad and shallow, covered with erosion-resistant grasses used to carry surface water.
- (5) *Land grading:* Reshaping the ground surface by grading to planned slopes and configurations that will prevent excessive erosion conditions.
- (6) *Mulching:* The application of plant or other suitable materials on the soil surface to conserve moisture, reduce erosion and aid in establishing plant cover.
- (7) Sediment barriers: A temporary barrier installed to intercept runoff containing sediment. The barrier shall filter sediment and allow runoff to pass through. Sediment barriers may include straw bale barriers and silt fences.

Excavation means the act of removing dirt or soil (see Cut).

Fill means the portion of land surface or area to which soil, rock or other materials have been or will be added; height above original ground surface after the material has been or will be added.

Grade means the slope or elevation of the ground surface prior to or after cutting and filling.

Grading means any operation or occurrence by which the existing site elevations are changed by cutting, filling, borrowing or stockpiling, or where any ground cover, natural or manmade, is removed, or any buildings or other structures are removed or any watercourse or body of water, either natural or manmade, is relocated on any site, thereby creating an unprotected area. Grading shall be synonymous with land disturbance activity.

Hazardous material means any material, including any substance, waste, or combination thereof, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may cause, or significantly contribute to, a substantial present or potential hazard to human health, safety, property or the environment when improperly treated, stored, transported, disposed of or otherwise managed.

Immediate threat to public health and safety means a very serious threat to the community or adjacent property including, but not limited to, clogged drainage ditches, flooding of adjacent properties, threat of landslides or other problems which should be resolved without delay. In instances where this is the case, verbal instructions to remedy the situation with follow-up of written notification shall be sufficient to meet the notification requirements of this article.

Illicit discharge means either of the following:

- (1) Any discharge to a municipal separate storm sewer system that is not composed entirely of stormwater, except as authorized herein.
- (2) Any infiltration into the storm drain system resulting from spills, illegal dumping, or contaminated runoff from residential, commercial or industrial properties.

Illicit connection means either of the following:

- (1) Any drain or conveyance, whether on the surface or subsurface, that allows an illicit discharge to enter the storm drain system, including but not limited to any conveyance that allows any non-stormwater discharge (including sewage, processed wastewater or wash water) to enter the storm drain system or any connection to the storm drain system from an indoor drain or sink, regardless of whether said connection had been previously allowed, permitted or approved by an authorized enforcement agency.
- (2) Any drain or conveyance connected from a commercial or industrial land use to the storm drain system that has not been documented in plans, maps or equivalent records and approved by an authorized enforcement agency.

Land disturbance plan means the plan required before a grading permit may be issued. A land disturbance plan consists of a narrative description and appropriate drawings and plans that spell out the methods, techniques and procedures to be followed on a site to control erosion and other potential degradation of adjoining or nearby properties, during and after development, including methods of final stabilization of the site.

Municipal separate storm sewer system (MS4) means the system of conveyances (including <u>sidewalks</u>, walks, roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, manmade channels, or storm drains):

- (1) Owned or operated by the city;
- (2) Designed or used for collecting or conveying stormwater;
- (3) Which is not a combined sewer; and
- (4) Which is not part of a sanitary sewage treatment facility operated by a public utility.

National Pollutant Discharge Elimination System (NPDES) permit means a permit issued by the EPA or by the state under authority delegated by the EPA that authorizes the discharge of pollutants to waters of the United States, whether the permit is applicable on an individual, group, or general area-wide basis.

Non-stormwater discharge means any discharge to the storm drain system that is not composed entirely of stormwater.

Owner means the person or entity holding the registered title to property. The city property tax rolls shall be prima facie evidence that the person or entity listed therein is the registered owner.

Permit holder means the owner of the property or the owner's representative in whose name a permit has been applied for and issued by the city.

Pollutant means anything that causes or contributes to pollution. Pollutants may include, but are not limited to: paints, varnishes and solvents; oil and other automotive fluids; non-hazardous liquid and solid wastes and yard wastes; refuse, rubbish, garbage, litter or other discarded or abandoned objects and accumulations, so that some may cause or contribute to pollution; floatables; pesticides and fertilizers; hazardous substances and wastes; sewage, fecal <u>coli formcoliform</u> and pathogens; dissolved and particulate metals; animal wastes; wastes and residues that result from constructing a building or structure; and noxious or offensive matter of any kind.

Potable water means any water from a public water supply system or private well that is suitable to drink.

Sediment means rocks, sand, gravel, silt or other material deposited by action of wind, water or gravity.

Sedimentation means the action of settling out of the soil particles which are transported by wind, water or gravity.

Chapter 56 STORMWATER MANAGEMENT, EROSION CONTROL AND FLOOD DAMAGE PREVENTION

Site means any tract, lot or parcel of land or combination of tracts, lots or parcels of land proposed for development.

Stop work order means an order issued by the city requiring construction activity on a site to be stopped.

Stormwater means any accumulation of water from rain, snow or other forms of precipitation.

Stormwater runoff means stormwater flowing over the surface of the ground or collected in channels, watercourses or conduits, measured in depth of inches.

Stripping means any activity which removes or significantly disturbs the vegetative cover, including clearing and grubbing operations and top soil stripping.

Subdivision regulations means the City of Brentwood document written to cover a wide range of activities related to subdivision and/or development of land within the City of Brentwood as included as appendix A of the zoning ordinance.

Substantial rebuild lot means a lot on which modification to an existing structure or the lot itself is proposed, including but not limited to, residential addition, swimming pool, or other accessory building or structure such that the increase in impervious surface is greater than or equal to 800 square feet.

TDEC means the Tennessee Department of Environment and Conservation.

USGS means the U.S. Geological Survey, an agency of the U.S. Department of the Interior.

Vegetative cover means grasses, shrubs, trees and other vegetation which hold and stabilize soils.

Wastewater means the discharge of any water or other liquid, other than uncontaminated stormwater.

Waterway natural area or_WNA means the area adjacent to, on either side, an intermittent or perennial stream waterway, as determined by the city, state, or USGS topographic information that is to remain in its natural state to protect the quality and ecology of the stream.

(Ord. No. 2008-02, § 1, 3-24-2008; Ord. No. 2021-20-, § 1, 9-13-2021)

Secs. 56-3—56-10. Reserved.

DIVISION 2. EROSION AND SEDIMENT CONTROL¹

Subdivision I. Grading Permits

Sec. 56-11. Grading permit procedure.

(a) Requirements. Except as otherwise exempted in section 56-12, no person shall engage in any land disturbing activity which will modify the existing grade and/or may result in increased soil erosion or sedimentation, including, but not limited to, clearing, stripping, grading, excavation, transporting and filling, unless a grading permit has first been obtained from the city's engineering department. The owner of the property or their representative shall complete an application as provided by the planning department and shall submit a proposed land disturbance plan with the application in compliance with section 56-13 herein and the subdivision regulations where applicable. The property owner shall be responsible for compliance with all

¹Editor's note(s)—Ord. No. 2011-07, adopted June 27, 2011, amended Div. 2 in its entirety to read as herein set out. Former Div. 2, §§ 56-11—56-40, pertained to similar subject matter and derived from Ord. No. 2008-02, § 1, adopted March 24, 2008; and Ord. No. 2010-15, §§ 1 and 2, adopted Aug. 23, 2010.

provisions of this article. The grading permit does not preclude additional permits or authorization required by the state or the city. Any commercial developments and residential subdivision developments are subject to the subdivision regulations pertaining to stormwater quantity and quality requirements.

- (b) Staff authorization; appeals of staff decisions. No grading permit or building permit shall be issued until the proposed land disturbance is reviewed and approved by the city's engineering department. The engineering department shall require such revisions to the land disturbance plan as may be necessary to carry out the intent of this chapter. In the event a property owner or permit applicant disputes a decision made by the engineering department in regard to the review of a land disturbance plan, an appeal may be filed with the board of building construction appeals as set forth in chapter 14, article II of this Code.
- (c) Fees. In order to defray costs associated with the processing of permits and for inspections of land disturbance activities, a nonrefundable fee as established in subsection 14-72(h) or such other applicable section of this Code shall be required with the application for a grading permit.
- (d) Security. Prior to the issuing of a permit for any land disturbance activity affecting more than five acres, the applicant shall be required to provide a letter of credit or cashier's check to the city to guarantee completion of all land and grade stabilization measures and improvements as shown by the approved plan. For smaller areas when potentially hazardous soil or drainage conditions exist due to types of soils, steep grades, floodplain development or nearby lakes, streams or large drainage ditches, the applicant may be required, at the discretion of the engineering department, to provide a letter of credit or cashier's check to the city to guarantee completion of all land and grade stabilization measures and improvements as shown by the approved plan. The city's engineering director or designee shall establish the amount and time period of the security, based on the estimated cost and time for completing the plan. Within 30 days of the engineering department's determination that all provisions of the approved plan have been completed or upon receipt of performance security for required subdivision improvements by the city, such land and grade stabilization security shall be refunded or terminated.

(Ord. No. 2011-07, 6-27-2011; Ord. No. 2021-20-, § 2, 9-13-2021)

Sec. 56-12. Properties exempt from grading permit requirements.

The following uses and activities shall be exempt from the requirements for a grading permit:

- (1) *Single-family residence.* The construction of a single-family residence, with an approved building permit, on a lot with grades less than 15 percent; provided, however, such construction shall be required to comply with the erosion control requirements set forth in subsection 56-13(3).
- (2) *Driveway*. The construction of a driveway, with an approved miscellaneous permit, on a lot with grades less than 15 percent; provided, however, such construction shall be required to comply with the erosion control requirements set forth in subsection 56-13(3) and code requirements.
- (3) Additions or modifications to existing structures or lots. The modification to an existing structure or lot including a residential addition, swimming pool, or other accessory building or structure such that the increase in impervious surface is less than 800 square feet; provided, however, such construction shall be required to comply with the erosion control requirements set forth in subsection 56-13(3).
- (4) Public utilities and roadway construction. The installation, maintenance and repair of any public utility, as well as public roadway and storm drainage construction and maintenance by governmental agencies and/or their agents; provided, however, that such land-disturbing activity shall otherwise comply fully with the rules and regulations set forth by TDEC and this article.

- (5) *Agricultural uses.* Farming or other accepted agricultural uses, as identified in the Tennessee Right to Farm Act (T.C.A. § 43-26-101 et seq., or as hereafter replaced or amended.)
- (6) Lawns/gardens/landscaping. Home gardens, home landscaping or lawn preparations on existing lots or parcels, unless the possibility for erosion or alteration of drainage patterns or structures is such to necessitate a grading permit, as determined by the city's engineering department.

(Ord. No. 2011-07, 6-27-2011; Ord. No. 2021-20-, § 3, 9-13-2021)

Sec. 56-13. Land disturbance plan.

A land disturbance plan required under the provisions of this article shall comply with the requirements set forth in this section. The complexity of the plan shall be commensurate with the severity of site conditions and potential for off-site damage. The engineering department may require additional information if deemed necessary and appropriate to evaluate the feasibility of the plan.

- (1) Basic plan requirements. The plan shall identify the specific and appropriate erosion control practices and sediment trapping facilities proposed for the site to be disturbed, as well as a schedule for implementation and maintenance. The plan shall address the specific requirements of sections 58-14 through 58-18 herein. The plan shall also identify final stabilized conditions for the site, provisions for removing temporary control measures and stabilization of the site when temporary measures are removed, permanent stormwater conveyance structures and maintenance requirements for any permanent measures.
- (2) Professional design. The land disturbance plan shall be developed by a licensed Tennessee professional engineer or landscape architect when the area of disturbance meets substantial rebuild lot requirements, is greater than five acres, affects parking areas, or when potentially hazardous soil or drainage conditions exist due to types of soils, steep grades, floodplain development or nearby lakes, streams or large drainage ditches.
- (3) Erosion control. Erosion control measures shall be designed and carried out in accordance with the TDEC construction general permit for storm water discharge and the requirements of the city's Best Management Practices Manual. Areas that are to be developed or excavated shall apply these guidelines, fitting the appropriate measures to the specific soils and topography so as to minimize soil erosion and surface water runoff. The erosion control measures shall be maintained, and replaced if necessary, until vegetative cover is significantly established.
- (4) Protection of natural vegetation and trees. Natural vegetation shall be retained and protected whenever feasible during construction. If an area is stripped of vegetation during construction, the exposed area shall be limited to the smallest practical size, and duration of the exposure limited to the shortest practical time.
- (5) Minimum information required. It shall be at the discretion of the city's engineering director to determine how much information is necessary to obtain a grading permit. The engineering director may also determine the number of paper copies of the land disturbance plan to be submitted, and/or may require that the plan be submitted in a specified electronic format. At a minimum, a land disturbance plan shall contain the following:
 - a. The registration seal and signature of the Tennessee licensed professional engineer or landscape architect who prepared the plan.
 - b. Name, address and telephone number of the applicant, and the owners and developer, if other than the applicant, of the property to be graded.

- c. Email address for the design engineer or landscape architect.
- d. A brief project description.
- e. Current field run topography and actual elevations based on an identified benchmark by a Tennessee licensed professional land surveyor. Drawings showing pre-development topographic conditions and post-development grades, at a scale appropriate to the land area of the plan, and with contour intervals no greater than two feet. All existing improvements and utilities public and private shown. The plan shall include off-site existing topographic conditions extended to a minimum of 25 feet beyond the boundaries of the subject tract if grading is designed to be within 20 feet of any boundary line. Information on all public roads and utilities adjoining the subject property shall also be included. Identification of existing trees in excess of four-inch caliper and trees to be preserved shall be shown.
- f. The site location, boundaries, adjacent properties, location of any existing or proposed structures on the property or on adjacent land within 100 feet of the area to be disturbed, floodplain areas, ditch lines and any existing on-site and off-site structural or natural features of the land which have a significant impact on drainage or sediment control.
- g. The location and a description of temporary and permanent erosion control measures and drainage apparatuses to be constructed and structural changes and improvements to the land, including clearing and grading limits, daily cleanup and site control practices (to include designated concrete washout locations and waste disposal measures) and other activities to mitigate the adverse impact of land disturbance.
- h. Vicinity map with legible street names. Address, and zoning in title block. Include subdivision and lot number where applicable. Adjacent lot numbers and parcel data. Include recorded plat book and page number in title block.
- i. Standard details to include typical drainage swales, silt fence, temporary construction entrance, tree protection, retaining walls (if applicable) sealed by a Tennessee licensed professional engineer for walls that are four feet or greater in height, and additional items as necessary to mitigate the adverse impact of land disturbance.
- j. Property lines with bearing and distances to two decimal places. Building setbacks, easements, and all public utilities shown, labeled and dimensioned.
- k. Proposed contours distinguishable from existing contours. Spot elevations as necessary for proposed improvements. Site elevations, existing LFE, proposed LFE, minimum LFE.
- I. Retaining walls greater than four feet in height shall be certified by a Tennessee licensed professional engineer upon completion. Retaining wall heights to meet Subdivision Regulation and Municipal Code requirements.
- m. Drainage for sites shall be designed by a Tennessee licensed professional engineer. Hydraulic and hydrologic data to meet Subdivision Regulation requirements. All existing and proposed drainage pipes (including gutter downspouts if extended more than ten feet from structure) shall be shown on the plan.
- n. Site improvements are subject to regulation and code requirements applicable to the type of improvement proposed.

(Ord. No. 2011-07, 6-27-2011; Ord. No. 2021-20-, § 4, 9-13-2021)

Sec. 56-14. Construction access routes.

Prior to the initiation of any grading work, a stabilized stone pad shall be placed at any point where traffic will be entering or leaving a construction site. Stone pads shall contain ASTM-1 stone, six inches thick over filter fabric, with a minimum width of 12 feet and a minimum length from the public or private road of 100 feet for commercial property and 50 feet for residential property.

(Ord. No. 2011-07, 6-27-2011)

Sec. 56-15. Cut and fill slopes.

Permanent cut and fill slopes shall be designed and constructed in a manner that will minimize erosion. Consideration shall be given to the length and steepness of the slope, the soil type, upslope drainage area, groundwater conditions and other applicable factors. Any slopes installed at two-foot horizontal to one-foot vertical shall be stabilized with acceptable design methods as provided in the subdivision regulations.

(Ord. No. 2011-07, 6-27-2011; Ord. No. 2021-20-, § 5, 9-13-2021)

Sec. 56-16. Stabilization of denuded areas and soil stockpiles.

Permanent erosion control measures shall be applied to denuded areas within 14 days after final grade is reached on any portion of the site. Soil stabilization shall also be applied within 14 days to any denuded area which may not be at final grade but will remain dormant (undisturbed by construction activity) for longer than 60 days. Any temporary soil stockpiles shall be stabilized or protected with sediment trapping measures to prevent erosion. Applicable erosion control measures shall include establishment of vegetation, mulching and the early application of gravel base on areas to be paved. Selected permanent or temporary erosion control measures shall be appropriate for the time of year, site conditions and estimated duration of use.

(Ord. No. 2011-07, 6-27-2011; Ord. No. 2021-20-, § 6, 9-13-2021)

Sec. 56-17. Establishment of permanent vegetation.

A permanent vegetative cover shall be established on denuded areas not otherwise permanently stabilized through the construction of approved structures and parking lots or driveways. Permanent vegetation shall not be considered stabilized until a ground cover is achieved, which in the opinion of the city's engineering director or his designee is mature enough to control erosion and to survive seasonal conditions for a period of one year from initial planting.

(Ord. No. 2011-07, 6-27-2011)

Sec. 56-18. Protection of adjacent properties.

- (a) *Downhill protection.* All properties adjacent to and/or downhill from the site of a land disturbance shall be protected from soil erosion and sedimentation. This shall be accomplished by preserving a well-vegetated buffer strip around the lower perimeter of the land disturbance or by installing perimeter controls such as sediment barriers, filters or dikes, or sediment basins, or by a combination of such measures.
- (b) Use of buffer strips. Vegetated buffer strips shall be used alone only where stormwater runoff is anticipated to occur through sheet flow and shall be a minimum of 20 feet in width. If at any time it is found that a vegetated buffer strip alone is ineffective in stopping erosion onto adjacent property, additional perimeter controls shall be provided by the owner.

- (c) Sediment control. Sediment basins and traps, perimeter dikes, sediment barriers, dams, diversions and other erosion control measures intended to trap sediment on-site shall be constructed as the first step in grading and shall be made functional prior to disturbance of upslope land. Earthen structures such as dams, dikes and diversions shall be seeded and mulched within seven days of installation.
- (d) Stormwater runoff. Stormwater runoff from disturbed areas five acres or greater shall pass through a sediment basin or other suitable sediment trapping facility. All storm drainage inlets shall be protected during construction with a sediment barrier to prevent clogging and localized flooding. All means of protection shall be maintained and monitored throughout construction.
- (Ord. No. 2011-07, 6-27-2011)

Sec. 56-19. Inspections; corrections of problems.

- (a) *Permit holder's responsibility.* Upon issuance of a grading permit, it shall be the responsibility of the permit holder to:
 - (1) Promptly notify the city in writing of any proposed changes to the phasing plan and schedules for the land disturbance activities and periodic maintenance as included in the approved land disturbance plan, provided that such proposed changes may be rejected or revised by the city's engineering department; and
 - (2) Conduct periodic inspections of the erosion control measures installed during construction and of nearby downstream properties, to determine if the land disturbance plan is effective. The permit holder shall make immediate arrangements for the repair or remediation of any damage to downhill property caused by erosion, such as clogged storm sewers, inlets or drainage ditches.
- (b) City authority. The city's engineering director or his designee may enter upon any site for which a grading permit has been issued and periodically make inspections of any area before, during and after construction to ensure compliance with the requirements of this article and the authorized land disturbance plan. If the engineering director or his designee determines that significant erosion problems are occurring on the site, notwithstanding compliance with the approved land disturbance plan, the permit holder shall be required to take additional corrective actions to protect the adversely affected area. The specifications of the additional measures shall be considered as an amendment to the land disturbance plan. The engineering director or his designee may also require that the phasing plan and schedules for the land disturbance activities and periodic maintenance be revised at any point in order to meet the intent of this chapter.

(Ord. No. 2011-07, 6-27-2011)

Secs. 56-20-56-30. Reserved.

Subdivision II. Waterway Natural Areas

Sec. 56-31. Waterway natural areas.

In order to create, protect and maintain water quality buffers, a waterway natural area (WNA) shall be established as part of any new development or redevelopment of property bordering or traversed by an intermittent or perennial stream waterway. The following provisions are hereby established for the designation, protection and maintenance of WNAs:

(1) WNAs shall be designated along all intermittent and perennial stream waterways as determined by the city, state or USGS topographic information. This determination shall be conducted at the preliminary

planning phase; however, the city reserves the right to identify a waterway at any point until construction plans have been approved.

- (2) In any residential subdivision, the WNA, if required, shall be designated as open space. No portion of the WNA may be within a private lot. The WNA within an OSRD subdivision's open space shall be counted toward the open space requirements for the subdivision at 100 percent of the WNA's area unless the WNA falls within an area for which another percentage applies.
- (3) The WNA width, as measured from the top of the bank on each side of the waterway, shall be as follows:

| Upstream | WNA Width |
|------------------------|--------------|
| Watershed | |
| Area | |
| | |
| At least 1 square mile | 60 feet |
| | |
| Less than 1 square | 30 feet |
| mile | |

- (4) If the required width of a WNA or waterway buffer under federal or state regulations differs from the width required by the city, the more stringent requirement shall govern. Notwithstanding the foregoing, the planning commission may reduce the width of a WNA if the state department of environment and conservation has authorized such a reduction.
- (5) The WNA shall be recorded on all final plats approved on or after June 1, 2008 for property bordering or traversed by an intermittent or perennial stream waterway, provided that the requirement for a WNA may be waived or reduced if an unexpired preliminary plan was approved prior to June 1, 2008 and if, in the opinion of the city's engineering department, a WNA cannot be designated on the plat at the required width without significant impact to the approved development plan. For a final plat approved prior to June 1, 2008, the planning commission may require that any subsequent revisions provide for a WNA up to the extent a WNA would be required under this section for a new final plat if, in the opinion of the city's engineering department, a WNA can be so designated on the plat without significant impact to the approved prior to June 1 plat if, in the opinion of the city's engineering department, a WNA can be so designated on the plat without significant impact to the approved development plan.
- (6) All site development plans and plats prepared for recording shall:
 - a. Clearly identify the boundaries of any WNA on the subject property and label the area as "Waterway Natural Area."
 - b. Provide a note to reference any WNA stating: "There shall be no clearing, grading, construction or disturbance of vegetation within the waterway natural area, except as permitted by the City of Brentwood."
- (7) Any WNA or portions of any WNA shall also be designated as a public drainage easement if required by the planning commission, based on the recommendation of the city's engineering department.
- (8) All WNAs must be protected during development activities. Each WNA shall be staked and labeled as part of a construction layout survey prior to commencement of construction, using a combination of stakes and flagging to ensure adequate visibility.

- (9) Minor landscaping and stabilization is allowed within a WNA to repair erosion, damaged vegetation or other problems, if prior approval has been granted by the city's engineering department. Nothing shall be installed within a WNA except as permitted under this section.
- (10) Any person seeking a grading permit for property within a WNA shall provide evidence that appropriate permits required from federal and state regulatory agencies or written waivers of such permits have been obtained.
- (11) If a land use adjacent to a WNA involves subsurface discharges or surface application from a wastewater treatment system that serves more than one household or a nonresidential use, no effluent may be discharged in the WNA except as provided herein. If a NPDES wastewater permit has been granted, the permittee may convey the effluent through the WNA to the waterway designated in the NPDES permit.
- (12) No septic tanks may be located within a WNA. Septic field lines may be allowed within the WNA, but no closer than 25 feet from the top of the stream bank or such greater distance as may be required by the state or the Williamson County Department of Health.
- (13) No structures shall be allowed in a WNA, with the exception of greenway trails, drainage structures, watertight utility line crossings and bridges that have been approved by the city and are constructed to minimize disturbance to the WNA.

(Ord. No. 2011-07, 6-27-2011; Ord. No. 2015-15-, § 1, 12-14-2015)

Secs. 56-32—56-40. Reserved.

DIVISION 3. STORMWATER MANAGEMENT²

Sec. 56-41. Purpose.

The intent of this article is to protect the health and safety of the residents of the city; to control the level, intensity and quality of stormwater runoff; to minimize expenditure of public funds for costly flood control projects; to minimize the need for rescue and relief efforts associated with flooding; to maximize beneficial use of land without incurring flood hazard potential; to ensure a functional drainage system that will not result in excessive maintenance costs; to encourage the use of natural and aesthetically pleasing design; to ensure water quality; and to protect or improve ground waters and surface waters.

(Ord. No. 2011-07, 6-27-2011)

Sec. 56-42. Stormwater management plan.

(a) Drainage plan approval. Prior to approval of any site development plan or subdivision plat, approval of any construction plans or issuance of a grading permit, the engineering department shall determine whether there is a need for a stormwater management plan based upon the standards outlined in the city's subdivision regulations. When a stormwater management plan is required, such plan shall be submitted to the engineering department for review and approval.

²Editor's note(s)—Ord. No. 2011-07, adopted June 27, 2011, amended Div. 3 in its entirety to read as herein set out. Former Div. 3, §§ 56-41—56-50, pertained to similar subject matter and derived from Ord. No. 2008-02, § 1, adopted March 24, 2008.

- (b) Improvements required. The engineering department may require additional structural or other improvements designed to control the level, intensity and quality of stormwater runoff associated with the development, above and beyond the requirements outlined in the city's subdivision regulations, if local conditions warrant such additional measures.
- (c) Location/maintenance required. All structures or other improvements constructed to meet the requirements of this article shall remain in the ownership of the property owner, who shall be responsible for maintaining such improvements in accordance with section 56-43 unless an alternative plan is approved by the planning commission. In addition, any such structures or other improvements within a residential subdivision shall be located within permanent designated open space for the subdivision with the legally designated homeowners or property owners association being responsible for such maintenance. Prior to the recording of lots for a subdivision, subdivision covenant provisions or other legal documents ensuring the maintenance of such improvements and funding mechanism for said maintenance in perpetuity shall be submitted to the city attorney for his review and approval.

(Ord. No. 2011-07, 6-27-2011)

Sec. 56-43. Stormwater system long-term operation and maintenance.

- (a) All storm drainage systems, structures and facilities shall be maintained such that the original design function is preserved over time. The storm drainage elements requiring maintenance shall include, but not be limited to, detention/retention systems, outlet control structures, stormwater quality facilities and emergency overflows. These elements shall be maintained in accordance with a written "stormwater long-term operation and maintenance plan" developed by a Tennessee licensed professional engineer and approved by the city's engineering department. Said plan shall be attached to and form a part of a maintenance and inspection agreement, which shall be signed by the property owner or an official representative thereof, and recorded along with the plat, covenants, or other homeowners/property owners association documents. The form of the maintenance and inspection agreement and plan shall be approved by the city attorney. The agreement must contain a provision that grants access to the engineering director or his designee at any reasonable time for inspection of the facilities covered by the plan.
- (b) All stormwater long-term operation and maintenance plans shall include detailed operation and maintenance procedures to ensure the continued performance of the facilities. Each plan shall identify the parts or components of a stormwater management facility to be maintained and the necessary equipment and skills or training, along with an estimate of probable annual costs. Provisions for the periodic review and evaluation of the effectiveness of the maintenance program shall be included in the plan, so that revisions and additional maintenance procedures can be incorporated as necessary. A permanent elevation benchmark shall be identified in the plan to assist in the periodic inspection of the facility.

(Ord. No. 2011-07, 6-27-2011)

Sec. 56-44. Illicit discharges and connections.

- (a) Prohibition of illicit discharges and connections.
 - (1) All illicit discharges, as such terms are defined in section 56-2 or this chapter, are prohibited.
 - (2) The construction, use, maintenance or continued existence of illicit connections to the storm sewer system is prohibited. This prohibition expressly includes, without limitation, illicit connections made in the past, regardless of whether the connection was permissible under laws or practices applicable or prevailing at the time of connection.

- (3) Improper connections in violation of this section shall be disconnected and redirected, if necessary, to an approved on-site wastewater management system or the sanitary sewer system. Any connection to a sanitary sewer system must be approved by the governing utility.
- (b) Allowable non-stormwater discharges. Unless the city, TDEC, EPA or other regulatory agency has identified them as a source of pollutants to the state's waters, non-stormwater discharges into the municipal separate storm sewer system from the following sources are not considered to be illicit discharges:
 - (1) Water line flushing or other potable water sources, dechlorinated to potable water standards.
 - (2) Landscape irrigation or lawn watering with potable water.
 - (3) Diverted stream flows.
 - (4) Rising ground water.
 - (5) Groundwater infiltration to storm drains.
 - (6) Pumped groundwater.
 - (7) Foundation or footing drains.
 - (8) Crawl space pumps.
 - (9) Air conditioning condensation.
 - (10) Springs.
 - (11) Non-commercial washing of vehicles.
 - (12) Natural riparian habitat or wetland flows.
 - (13) Dechlorinated non-commercial swimming pools, other than salt water pools.
 - (14) Firefighting activities.
 - (15) Street wash water.
 - (16) Discharges authorized in writing by the city as being necessary to protect public health and safety.
 - (17) Dye testing approved by the city.
- (c) Notification of spills. Upon the release or suspected release of materials which is resulting in or may result in illicit discharges, the owner of the property from which the release occurs or is suspected, or any person responsible for a facility or operation from which the release occurs or is suspected, or any person responsible for emergency response for such a facility or operation shall:
 - (1) Take all necessary steps to ensure the discovery, containment and cleanup of such release. Any such property owner or other person who fails to take such necessary steps shall be in violation of this section.
 - (2) Immediately notify emergency response agencies of the occurrence via emergency dispatch services, if the release or suspected release involves hazardous materials.
 - (3) Notify the city's engineering department in person or by telephone no later than the next business day in the event of a release or suspected release of non-hazardous materials. Notifications by telephone shall be confirmed by written notice delivered to the engineering department within three business days of the telephone notice.

(4) Retain an on-site written record of the discharge and the actions taken to prevent its recurrence if the discharge of prohibited materials emanates from a commercial or industrial establishment. Such records shall be retained for at least three years.

(Ord. No. 2011-07, 6-27-2011)

Secs. 56-45—56-50. Reserved.

DIVISION 4. VIOLATIONS³

Sec. 56-51. Correction of soil erosion, stormwater runoff or illicit discharge problems; enforcement actions.

- (a) The city's engineering director is authorized to take enforcement actions as established in this section against:
 - (1) The owner of any property which exhibits stormwater runoff conditions, illicit discharges or unstable or eroding soil conditions resulting from a violation of a provision of this article.
 - (2) The owner of any property who has failed to adequately maintain and repair temporary or permanent erosion control, stormwater management facilities or illicit discharge prevention measures as needed to assure continued performance of their intended function.
- (b) Whenever the engineering director finds that any person has violated or is violating this article, or a condition of any permit or order issued hereunder, or the requirements of a land disturbance plan, stormwater management plan, or stormwater long-term operation and maintenance plan, enforcement actions taken by the director may include any of the measures described below, or such combinations of the measures described below as the engineering director determines to be appropriate under the circumstances. The implementation of any of the measures described below shall not preclude other remedial or punitive actions which may be taken under this Code or other applicable law.
 - (1) Notice of violation. The director may serve upon such person written notice of the violation. Where an immediate threat to public health and safety exists, verbal notice given by the engineering director or his designee to immediately correct the problem shall be sufficient, but shall be followed by written notice. Within ten days of receiving the initial notice, the recipient shall submit an explanation of the violation to the director, along with a plan for the satisfactory correction of the violation and prevention of future violations, including specific required actions. Submission of this plan in no way relieves any person of liability for any violations occurring before or after receipt of the notice of violation.
 - (2) Consent orders. The director is authorized to enter into consent orders, assurances of voluntary compliance, or other similar documentation establishing an agreement with the person responsible for the noncompliance. Such orders are to include specific action to be taken to correct the noncompliance within a time period also specified by the order. Consent orders shall have the same force and effect as administrative orders issued pursuant to subsections (4) and (5) below.

³Editor's note(s)—Ord. No. 2011-07, adopted June 27, 2011, amended Div. 4 in its entirety to read as herein set out. Former Div. 4, § 56-51, pertained to similar subject matter and derived from Ord. No. 2008-02, § 1, adopted March 24, 2008.

Brentwood, Tennessee, Code of Ordinances (Supp. No. 52)

- (3) Administrative hearing. The director may order such person to show cause why a proposed enforcement action should not be taken. Notice shall be served on such person specifying the time and place for the hearing, the proposed enforcement action and the reasons for such action, and the opportunity for the violator to show cause why the proposed enforcement action should not be taken. The notice shall be served personally or by certified mail (return receipt requested) at least ten days prior to the hearing.
- (4) Compliance order. The director may issue an order to such person, directing that the violation be corrected within a specific time period. Corrective action ordered by the director may include, but is not limited to, the installation and proper operation of adequate structures and/or devices, and the implementation of procedures. Orders may also contain such other requirements as might be reasonably necessary and appropriate to address the noncompliance, including but not limited to the establishment of management practices and self-monitoring plans.
- (5) *Cease and desist/stop work orders.* The director may issue an order to cease and desist all such violations and direct any person in noncompliance to:
 - a. Stop all construction activities, or at the director's discretion, all portions of the construction activities that are contributing to a violation;
 - b. Comply forthwith with the provisions of this article and the conditions of any permit or order issued hereunder; and/or
 - c. Take such appropriate remedial or preventive action as may be needed to properly address a continuing or threatened violation, including halting operations and terminating stormwater runoff conditions, illicit discharges or unstable or eroding soil conditions.
- (6) *Permit revocation.* The director may revoke any permit issued by the city for construction activities on the property.
- (c) Should the property owner fail to comply with any provision of this article, any condition of a permit or order issued hereunder, or the requirements of a land disturbance plan, stormwater management plan, or stormwater long-term operation and maintenance plan within the time prescribed by the city's engineering director, the director may direct that the violation be remedied by an appropriate city department or through an outside contractual arrangement. Upon completion of work, the engineering department shall determine the reasonable costs thereof and bill the owner of the property. Should the owner fail to remit to the city the amount due within 30 days from the date of the bill, the amount due shall be certified to the city attorney, who may undertake such legal action as may be needed to collect the amount due, including an action to attach a lien to the property for which the expenditure was made.

(Ord. No. 2011-07, 6-27-2011)

Sec. 56-52. Penalties.

- (a) City court citations and penalties. Any person who violates any provision of this article, who violates the provisions of any permit or plan issued or approved pursuant to this article, or who fails or refuses to comply with any communication or notice to abate or take corrective action by the engineering director shall be guilty of a civil offense, for which a citation may be issued and penalty imposed pursuant to the provisions of section 1-9 of this Code.
- (b) Alternative penalties for stormwater violations. As an alternative to the penalty established under subsection (a) above, and pursuant to T.C.A. § 68-221-1106, the city's engineering director may assess a civil penalty of not less than \$50.00 and not more than \$5,000.00 per day for each day of violation against any person

violating any provision of this article regulating stormwater discharges or facilities. Each day of violation shall constitute a separate violation. The engineering director may waive portions of any assessed penalty if remedial action is taken within a timeframe designated by the engineering director at the time the penalty is assessed. In assessing a civil penalty under this subsection, the engineering director may consider each of the following factors:

- (1) The harm done to the public health or the environment.
- (2) Whether the civil penalty imposed will be a substantial economic deterrent to the illegal activity.
- (3) The economic benefit gained by the violator.
- (4) The amount of effort put forth by the violator to remedy this violation.
- (5) Any unusual or extraordinary enforcement costs incurred by the municipality.
- (6) The amount of penalty established by ordinance, resolution or administrative policy for specific categories of violations.
- (7) Any equities of the situation which outweigh the benefit of imposing any penalty or damage assessment.
- (c) *Recovery of damages and costs.* In addition to the civil penalty established in subsection (b) above, the city may recover;
 - (1) All damages proximately caused by the violator to the city, which may include any reasonable expenses incurred in investigating violations of, and enforcing compliance with, this article, or any other actual damages caused by the violation.
 - (2) The costs of the city's maintenance of stormwater facilities when the responsible party fails to maintain them as required by this article.
- (d) *Other remedies.* The city may bring legal action to enjoin the continuing violation of this article, and the existence of any other remedy, at law or equity, shall be no defense to any such actions.
- (e) *Remedies cumulative.* The remedies set forth in section 56-51 and this section 56-52 shall be cumulative, not exclusive, and it shall not be a defense to any action, civil or criminal, that one or more of the remedies set forth herein has been sought or granted.
- (Ord. No. 2011-07, 6-27-2011)

Sec. 56-53. Appeals.

- (a) Procedure for filing. Pursuant to T.C.A. § 68-221-1106(d), any person aggrieved by the imposition of a civil penalty or damage assessment as provided by this article may appeal said penalty or damage assessment to the city's board of building construction appeals. The appeal must be in writing and filed with the city recorder within 30 days after the civil penalty and/or damage assessment is served in any manner authorized by law. If an appeal of such damage assessment or civil penalty is not filed within 30 days after the damage assessment or civil penalty is served, the violator shall be deemed to have consented to the damage assessment or civil penalty and it shall become final.
- (b) Public hearing. Upon receipt of an appeal, the city's board of building construction appeals shall hold a public hearing within 30 days. At least ten days' prior notice of the time, date, and location of said hearing shall be published in a newspaper of general circulation. Ten days' notice by certified mail shall also be provided to the aggrieved party, such notice to be sent to the address provided by the aggrieved party at the time of

appeal. The decision of the board of building construction appeals shall be final, subject to such further appeals as may be filed pursuant to subsection (c) below.

- (c) Appealing decisions of the board of building construction appeals. Any alleged violator may appeal a decision of the city's board of building construction appeals, pursuant to the provisions of T.C.A. Title 27, Chapter 8.
- (d) *Collection of penalties and assessments.* Whenever any damage assessment or civil penalty has become final, the city may apply to the appropriate chancery court for a judgment and seek execution of such judgment.

(Ord. No. 2011-07, 6-27-2011)

Secs. 56-54—56-60. Reserved.

ARTICLE II. FLOOD **DAMAGE** PREVENTION

DIVISION 1. FINDINGS OF FACT, PURPOSE AND OBJECTIVES

Sec. 56-61. Findings of fact.

The city hereby finds:

- (1) The city and its board of commissioners wish to maintain eligibility in the National Flood Insurance Program (NFIP) and, in order to do so, must meet the <u>NFIP</u> regulations found in Title 44 of the Code of Federal Regulations (CFR), Ch. 1, Section 60.3.
- (2) Areas of the city are subject to periodic inundation which could result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.
- (3) Flood losses are caused by the cumulative effect of obstructions in floodplains, causing increases in flood heights and velocities; <u>the cumulative effect of land use changes, resulting in increased runoff</u>; uses in flood hazard areas which are vulnerable to floods; or construction which is inadequately elevated, floodproofed, or otherwise unprotected from flood damages.

(Ord. No. 2009-13, § 3, 1-25-2010)

Sec. 56-62. Purpose and objectives.

- (a) It is the purpose of this article to promote the public health, safety and general welfare and to minimize public and private losses due to flood conditions in specific areas. This article is designed to:
 - (1) Restrict or prohibit uses which are vulnerable to flooding or erosion hazards, or which result in damaging increases in erosion, flood heights, or velocities;
 - (2) Require that uses vulnerable to floods, including community facilities, be protected against flood damage at the time of initial construction;
 - (3) Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters;
 - (4) Control filling, grading, dredging and other development which may increase flood damage or erosion; and

Chapter 56 STORMWATER MANAGEMENT, EROSION CONTROL AND FLOOD DAMAGE PREVENTION

- (5) Prevent or regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands.
- (b) The objectives of this article are:
 - (1) To protect human life, health, safety and property;
 - (2) To minimize expenditure of public funds for costly flood control projects;
 - (3) To minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;
 - (4) To minimize prolonged business interruptions;
 - (5) To minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, and streets and bridges located in floodprone areas;
 - (6) To help maintain a stable tax base by providing for the sound use and development of floodprone areas to minimize blight in flood areas;
 - (7) To ensure that potential homebuyers are notified that property is in a floodprone area; and
 - (8) To maintain eligibility for participation in the NFIP.

(Ord. No. 2009-13, § 3, 1-25-2010)

DIVISION 2. DEFINITIONS

Sec. 56-63. Definitions.

The following words, terms and phrases, when used in this article, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning. The definitions listed in this section apply exclusively to this article and are intended to provide assistance in the interpretation and enforcement of this article. Unless specifically defined below or elsewhere in this Code, words or phrases used in this article shall be interpreted as to give them the meaning they have in common usage and to give this article its most reasonable application, given its stated purpose and objectives.

100-year flood. See "base flood".

Accessory structure means a subordinate structure to the principal structure on the same lot and, for the purpose of this article, shall conform to the following:

- (1) Accessory structures shall only be used for parking of vehicles and storage.
- (2) Accessory structures shall be designed to have low flood damage potential.
- (3) Accessory structures shall be constructed and placed on the building site so as to offer the minimum resistance to the flow of floodwaters.
- (4) Accessory structures shall be firmly anchored to prevent flotation, collapse and lateral movement, which otherwise may result in damage to other structures.
- (5) Utilities and service facilities such as electrical, heating equipment and duct-work shall be elevated at or above the regulatory flood protection elevation or otherwise protected from intrusion of floodwaters.

Act means the statutes authorizing the National Flood Insurance Program<u>NFIP</u> that are incorporated in 42 U.S.C. 4001-4128.

Addition (to an existing building) means any walled and roofed expansion to the perimeter or height of a building. <u>See "horizontal addition" and "vertical addition".</u>

Administrator means the city manager or his designee, who shall be responsible for the implementation and administration of the provisions set forth herein for the special flood hazard area.

Appeal means a request for a review of a local enforcement officer's interpretation of any provision of this article or a request for a variance.

Area of shallow flooding means a designated AO or AH zone on a community's flood insurance rate map (FIRM) with one percent or greater annual chance of flooding to an average depth of one to three feet where a clearly defined channel does not exist, where the path of flooding is unpredictable and indeterminate, and where velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

Area of special flood hazard. See "special flood hazard area".

Base flood means the flood having a one percent chance of being equaled or exceeded in any given year. This term is also referred to as the 100-year flood or the one percent annual chance flood.

Basement means any portion of a building having its floor subgrade (below ground level) on all sides.

Buildable area means the area of a lot remaining after the minimum yard requirements for the specific zoning district have been met.

Building means any manmade walled and roofed structure affixed to a permanent site. (See "structure".)

<u>Code of Federal Regulations (CFR) means the codification of the general and permanent rules and regulations</u> <u>published in the Federal Register by the executive departments and agencies of the federal government.</u>

<u>Conditional letter of map revision (CLOMR)</u> means a letter from FEMA commenting on a proposed project that would, upon construction, affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway, the effective Base Flood Elevations (BFEs), or the Special Flood Hazard Area (SFHA). The letter does not revise an effective FIRM; it indicates whether the project, if built as proposed, would meet minimum NFIP standards (see Title 44, Chapter 1, CFR, Parts 60, 65, and 72) and be recognized by FEMA.

Conditional letter of map revision based on fill (CLOMR-F) means a letter from FEMA stating that a parcel of land or proposed structure that will be elevated by fill would not be inundated by the base flood if fill is placed on the parcel as proposed or the structure is built as proposed.

Deck means an above-grade platform <u>attached anywhere other than the front entrance to a building</u>, with or without a roof, <u>which may have supporting columns</u> but <u>must be unenclosed by without</u> any walls, <u>windows</u>, <u>glass</u> <u>or screening including but not limited to glass or screens</u>.

Declaration of Land Restriction (Nonconversion Agreement) means a form provided by the Administrator to be signed and recorded by the owner on the property deed with the Register of Deeds for Williamson County, for the owner to agree not to convert or modify in any manner that is inconsistent with the terms of the building permit and these regulations, enclosures below elevated buildings, attached garages or storage rooms, detached garages, or accessory structures.

Development means any manmade change to improved or unimproved real estate, including, but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavating, drilling operations, or storage of equipment or materials.

Page 19 of 41

Development permit means any permit required for development activities under this Code, or under any other code which has been adopted by the city.

Elevated building means a non-basement building built to have the lowest floor of the lowest enclosed area elevated above the ground level by means of solid foundation perimeter walls with openings sufficient to facilitate the unimpeded movement of floodwater, pilings, columns, piers, or shear walls adequately anchored so as not to impair the structural integrity of the building during a base flood event.

Erosion means the process of the gradual wearing away of land masses. This peril is not <u>"per se"</u> covered under the NFIP.

Exception means a waiver from the provisions of this article which relieves the applicant from the requirements of a rule, regulation, order or other determination made or issued pursuant to this article.

Existing construction means any structure for which the "start of construction" commenced before November 27, 1972 (the effective date of the initial floodplain management code adopted by the city as a basis for participation in the NFIP).

Existing structures. See "existing construction".

FEMA means the Federal Emergency Management Agency of the United States government.

Flood or flooding means:

- (1) General and temporary condition of partial or complete inundation of normally dry land areas from:
 - a. The overflow of inland or tidal-waters.
 - b. The unusual and rapid accumulation or runoff of surface waters from any source.
 - Mudslides (i.e., mudflows) which are proximately caused by flooding as defined in paragraph (1)b. of this definition and are akin to a river of liquid and flowing mud on the surfaces of normally dry land areas, as when earth is carried by a current of water and deposited along the path of the current.
- (2) The collapse or subsidence of land along the shore of a lake or other body of water as a result of erosion or undermining caused by waves or currents of water exceeding anticipated cyclical levels or suddenly caused by an unusually high water level in a natural body of water, accompanied by a severe storm, or by an unanticipated force of nature, such as flash flood-or an abnormal tidal surge, or by some similarly unusual and unforeseeable event which results in flooding as defined in paragraph (1)a. of this definition.

Flood elevation determination means a determination by the Federal Emergency Management Agency (FEMA) of the water surface elevations of the base flood, that is, the flood level that has a one percent or greater chance of occurrence in any given year.

Flood elevation study means an examination, evaluation and determination of flood hazards and, if appropriate, corresponding water surface elevations, or an examination, evaluation and determination of mudslide (i.e., mudflow) or flood-related erosion hazards.

Flood insurance rate map (FIRM) means an official map of a community, issued by FEMA, delineating the areas of special flood hazard or the risk premium zones applicable to the community.

Flood insurance study (*FIS*) is the official report provided by FEMA, evaluating flood hazards and containing flood profiles and water surface elevation of the base flood.

Floodplain or *floodprone area* means any land area susceptible to being inundated by water from any source (see definition of "flood").

Floodplain management means the operation of an overall program of corrective and preventive measures for reducing flood damage, including but not limited to emergency preparedness plans, flood control works and floodplain management regulations.

Flood protection system means those physical structural works for which funds have been authorized, appropriated and expended, and which have been constructed specifically to modify flooding in order to reduce the extent of the <u>special flood hazard</u> area within a community <u>subject to a "special flood hazard"</u> and the extent of the depths of associated flooding. Such a system typically includes <u>hurricane tidal barriers</u>, dams, reservoirs, levees or dikes. These specialized flood modifying works are those constructed in conformance with sound engineering standards.

Floodproofing means any combination of structural and nonstructural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, utility facilities, and structures and their contents.

Floodway means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height <u>of 1 foot</u>. (See Illustration #1.)

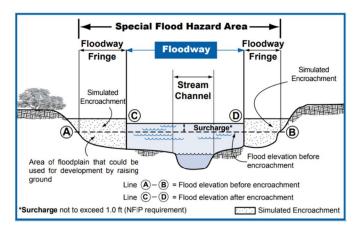

Illustration #1

Floodway encroachment lines mean the lines marking the limits of floodways on federal, state and local flood plain floodplain maps.

Floodway fringe means the area extending from the boundaries of the floodway to the outer boundary of the special flood hazard area, as depicted on a flood insurance rate map (FIRM). (See Illustration #1.)

Freeboard means a factor of safety usually expressed in feet above a flood level for purposes of floodplain management. "Freeboard" tends to compensate for the many unknown factors that could contribute to flood heights greater than the height calculated for a selected size flood and floodway conditions, such as wave action, blockage of bridge or culvert openings, and the hydrological effect of urbanization of the watershed.

Functionally dependent use means a use which cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking facilities, port facilities that are necessary for the loading and unloading of cargo or passengers, and ship building and ship repair facilities, but does not include long-term storage or related manufacturing facilities.

Highest adjacent grade means the highest natural elevation of the ground surface, prior to construction, adjacent to the proposed walls of a structure.

Historic structure means any structure that is:

- (1) Listed individually in the National Register of Historic Places (<u>i.e.</u>, a listing maintained by the U.S. Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
- (2) Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary of the Interior to qualify as a registered historic district;
- (3) Individually listed on the Tennessee inventory of historic places and determined as eligible by states with historic preservation programs which have been approved by the Secretary of the Interior; or
- (4) Individually listed on the City of Brentwood<u>or Williamson County</u>. Tennessee inventory of historic places and determined as eligible by communities with historic preservation programs that have been certified either:
- a. By the approved Tennessee program as determined by the Secretary of the Interior; or
- b. Directly by the Secretary of the Interior.

Horizontal addition (to an existing building) means any walled and roofed expansion to the perimeter of a building. See "addition" and "vertical addition".

Letter of map amendment (LOMA) is a letter from FEMA officially amending the SFHA shown on the FIRM based on natural high ground that is above the base flood elevation.

Letter of map revision (LOMR) is a letter from FEMA officially revising the effective FIRM and FIS report based on the implementation of physical measures that affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway, the effective BFEs, or the SFHA.

Letter of map revision based on fill (LOMR-F) is FEMA's modification of the special flood hazard area (SFHA) shown on the flood insurance rate map (FIRM) based on the placement of fill outside the existing regulatory floodway.

Levee means a manmade structure, usually an earthen embankment, designed and constructed in accordance with sound engineering practices to contain, control or divert the flow of water so as to provide protection from temporary flooding.

Lowest adjacent grade means the lowest natural elevation of the ground surface, prior to construction, adjacent to the proposed walls of a structure.

Lowest floor means the lowest floor of the lowest enclosed area, including a basement. An unfinished or flood resistant enclosure of seven and one-half feet or less in height, measured from the lowest adjacent grade to the lowest floor, usable solely for parking of vehicles, building access or storage in an area other than a basement area, shall not be considered a building's lowest floor, provided that such enclosure is built in compliance with the applicable non-elevation design requirements of this article.

Manufactured home means a structure, transportable in one or more sections, which is built on a permanent chassis and designed for use with or without a permanent foundation when attached to the required utilities. The term "manufactured home" does not include a "recreational vehicle".

Manufactured home park or subdivision means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

Map means the flood insurance rate map (FIRM) for a community issued by FEMA.

Mean sea level means the average height of the sea for all stages of the tide. It is used as a reference for establishing various elevations within the floodplain. For the purposes of this article, the term is synonymous with the National Geodetic Vertical Datum (NGVD) of 1929, the North American Vertical Datum (NAVD) of 1988 (NAVD or NAVD88), or other datum, to which base flood elevations shown on a community's the city's flood insurance rate mapFIRM are referenced.

National Flood Insurance Program (NFIP) means the National Flood Insurance Program authorized by 42 U.S.C. 4001-4128.

National Geodetic Vertical Datum <u>of 1929</u> (NGVD<u>or NGVD29</u>) means, as corrected in 1929, a vertical control used as a reference for establishing varying elevations within the floodplain.

New construction means any structure for which the "start of construction" commenced on or after November 27, 1972 and includes any subsequent improvements to such structure.

New manufactured home park or subdivision means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of November 27, 1972, or the date the property was first included within a special flood hazard area, whichever occurred later, and includes any subsequent improvements to such structures.

Nonsubstantial <u>improvement</u> means a any reconstruction, rehabilitation, addition, alteration or other improvement of a structure in which the cost is less than fifty percent (50%) of the market value of the structure before the "start of construction" of the initial improvement, which is not deemed a "substantial improvement," as defined herein.

North American Vertical Datum <u>of 1988</u> (NAVD <u>or NAVD88</u>) means, as corrected in 1988, a vertical control used as a reference for establishing varying elevations within the floodplain.

Person includes any individual or group of individuals, corporation, partnership, association, or any other entity, including state and local governments and agencies.

Porch means an above-grade platform attached at the front entrance to a building, with or without a roof, which may have supporting columns but must be unenclosed by walls, windows, glass or screening.

Reasonably safe from flooding means base floodwaters will not inundate the land or damage structures to be removed from the special flood hazard area and that any subsurface waters related to the base flood will not damage existing or proposed structures.

Recreational vehicle means a vehicle which is:

- (1) Built on a single chassis;
- (2) Four hundred square feet or less when measured at the largest horizontal projection;
- (3) Designed to be self-propelled or permanently towable by a light duty truck; and
- (4) Designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.

Regulatory flood protection elevation means the "base flood elevation (BFE)" plus the "freeboard". In "special flood hazard areas" this elevation shall be the BFE plus two-three feet.

Regulatory floodway. <u>See "floodway"</u>means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height.

Riverine means relating to, formed by, or resembling a river (including tributaries), stream, brook, etc.

Special flood hazard area (SFHA) is the land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year. The area may be designated as zone A on the FIRM as. After detailed ratemaking has been completed in preparation for publication of the FIRM, zone A may be refined into zones A, AO, AH, A1-30, AE or A99.

Special hazard area means an area having special flood, mudslide (i.e., mudflow), or flood-related erosion hazards, and shown on an FHBM or FIRM as zone A, AO, A1-30, AH, AE, AR, AR/A1-30, AR/AE, AR/AO, AR/AH, AR/A, A99, AH, VO, V1-30, VE, V, M, or E.

Start of construction includes substantial improvement, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure (including a manufactured home) on a site, such as the pouring of slabs or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; and includes the placement of a manufactured home on a foundation. Permanent construction does not include initial land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include the installation on the property of accessory buildings, such as garages or sheds, not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

State <u>coordination coordinating</u> agency means the Tennessee Emergency Management Agency, as designated by the governor of the State of Tennessee at the request of FEMA to assist in the implementation of the NFIP for the state.

Structure, for purposes of the floodplain management provisions of this article, means a walled and roofed building, a manufactured home, or a gas or liquid storage tank that is principally above ground.

Substantial damage means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before-damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

Substantial improvement means any reconstruction, rehabilitation, addition, alteration or other improvement of a structure, taking place during a five-year period, in which the cumulative cost equals or exceeds 50 percent of the market value of the structure before the "start of construction" of the initial improvement. This term includes structures which have incurred "substantial damage," regardless of the actual repair work performed. The market value of the structure should be the appraised value of the structure prior to the start of the initial improvement, or in the case of substantial damage, the value of the structure prior to the damage occurring. The market value can be based on: an appraisal of market value prepared within the previous 12 months by a Tennessee licensed real estate appraiser, 110% of the latest Market Appraisal Improvement Value determined by the Williamson County Property Assessor's Office, or an assessment of the structure's actual cash value (including depreciation) prepared within the previous 12 months. The term does not, however, include either:

(1) Any project for improvement of a structure to correct existing violations of state or local health, sanitary, or safety code specifications which have been pre-identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions and not solely triggered by an improvement or repair project; or

(2) Any alteration of a "historic structure", provided that the alteration will not preclude the structure's continued designation as a "historic structure".

Variance is a grant of relief from the requirements of this article.

<u>Vertical addition (to an existing building)</u> means any walled and roofed expansion to the height of a building. See "addition and "horizontal addition".

Violation means the failure of a structure or other development to be fully compliant with the regulations set forth in this article. A structure or other development without the elevation certificate, other certification, or other evidence of compliance required in this article is presumed to be in violation until such time as that documentation is provided.

Water surface elevation means the height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929, the North American Vertical Datum of 1988 (NAVD<u>88</u>) of 1988, or other datum, where specified, of floods of various magnitudes and frequencies in the floodplains of riverine areas.

(Ord. No. 2009-13, § 3, 1-25-2010; Ord. No. 2019-09-, § 1, 10-28-2019; Ord. No. 2021-05-, § 1, 2-22-2021)

DIVISION 3. GENERAL PROVISIONS

Sec. 56-64. Special flood hazard areas.

The special flood hazard areas for the city, as identified by FEMA, and in its flood insurance study (FIS) dated February 26, 2021 and flood insurance rate map (FIRM), Community 470205, Panel Numbers 47187C0086F, 47187C0087F, 47187C0088F, 47187C0089F, 47187C0091F, 47187C0204F, 47187C0205F, 47187C0206F, 47187C0207F, 47187C0208F, 47187C0209F, 47187C0220F and 47187C0240F, dated September 29, 2006, and Panel Numbers 47187C0093G and 47187C0094G dated December 22, 2016, and Panel Numbers 47187C0115G, 47187C0230G, and 47187C0235G, dated February 26, 2021, along with all supporting technical data and any revisions by LOMRs approved by FEMA, are adopted by reference and declared to be a part of this article.

(Ord. No. 2009-13, § 3, 1-25-2010; Ord. No. 2016-12-, § 1, 11-28-2016; Ord. No. 2019-09-, § 2, 10-28-2019; Ord. No. 2021-05-, § 2, 2-22-2021)

Sec. 56-65. Requirement for development permit.

A development permit shall be required in conformity with this article prior to the commencement of any development activities.

(Ord. No. 2009-13, § 3, 1-25-2010)

Sec. 56-66. Compliance.

No land, structure or use shall hereafter be located, extended, converted or structurally altered without full compliance with the terms of this article and other applicable regulations.

(Ord. No. 2009-13, § 3, 1-25-2010)

Sec. 56-67. Abrogation and greater restrictions.

This article is not intended to repeal, abrogate, or impair any existing easements, covenants or deed restrictions. However, where this article conflicts or overlaps with another regulatory instrument, whichever imposes the more stringent restrictions shall prevail.

(Ord. No. 2009-13, § 3, 1-25-2010)

Sec. 56-68. Interpretation.

In the interpretation and application of this article, all provisions shall be:

- (1) Considered as minimum requirements;
- (2) Liberally construed in favor of the governing body; and
- (3) Deemed neither to limit nor repeal any other powers granted under Tennessee statutes or this Code.

(Ord. No. 2009-13, § 3, 1-25-2010)

Sec. 56-69. Warning and disclaimer of liability.

The degree of flood protection required by this article is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur on rare occasions. Flood heights may be increased by manmade or natural causes. This article does not imply that land outside the areas of special flood hazard or uses permitted within such areas will be free from flooding or flood damages. This article shall not create liability on the part of the city or by any officer or employee thereof for any flood damages that result from reliance on this article or any administrative decision lawfully made hereunder.

(Ord. No. 2009-13, § 3, 1-25-2010)

Sec. 56-70. Penalties for violation.

- (a) Any person who violates the provisions of this article or fails to comply with any of its requirements, including any conditions and safeguards established in connection with grants of variance, shall be subject to punishment as provided in section 1-9 of this Code. In addition, any person who violates this article or fails to comply with any of its requirements shall pay all costs and expenses involved in the case. Each day any such violation continues shall be considered a separate offense. Nothing herein contained shall prevent the city from taking such other lawful actions to prevent or remedy any violation.
- (b) Any structure or development without certification or other evidence of compliance required in this article is presumed to be in violation until such time as the required documentation is provided. Any structure or development for which the city's approval is required shall be in violation of this article if such approval is not obtained prior to the commencement of construction or development.

(Ord. No. 2009-13, § 3, 1-25-2010)

Secs. 56-71—56-75. Reserved.

DIVISION 4. ADMINISTRATION

Sec. 56-76. Designation of administrator.

The city manager or the city manager's designee is hereby appointed to serve as the administrator, for the purpose of implementing the provisions of this article.

(Ord. No. 2009-13, § 3, 1-25-2010)

Sec. 56-77. Duties and responsibilities of the administrator.

Duties of the administrator shall include, but not be limited to, the following:

- (1) Review all development permits to assure that the permit requirements of this article have been satisfied, and that proposed building sites will be reasonably safe from flooding.
- (2) Review all proposed development to assure that all necessary permits have been received from those governmental agencies from which approval is required by federal or state law, including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334.
- (3) Notify adjacent communities and the Tennessee Emergency Management Agency <u>State NFIP Office</u> prior to any alteration or relocation of a watercourse and submit evidence of such notification to FEMA.
- (4) For any altered or relocated watercourse, submit assure that engineering data/analysis are submitted within six months to FEMA to ensure accuracy of community FIRMs through the letter of map revision LOMR process.
- (5) Assure that the flood carrying capacity within an altered or relocated portion of any watercourse is maintained.
- (6) Record the elevation, in relation to mean sea level<u>NAVD88</u>, or <u>height above</u> the highest adjacent grade, where applicable, of the lowest floor (including basement) of all new and substantially improved buildings, in accordance with section 56-78.
- (7) Where interpretation is needed as to the exact location of boundaries of the areas of special flood hazard area (for examplee.g., where there appears to be a conflict between a mapped boundary and actual field conditions), make the necessary interpretation. Any person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in this article.
- (8) When base flood elevation data and floodway data have not been provided by FEMA, <u>including areas</u> designated zone A on the community's FIRM, require development permit applicants to provide certification of base flood elevation and floodway data by a Tennessee registered licensed professional engineer, to assure that new construction, substantial improvements, or other development in special flood hazard areas on the city's FIRM meet the requirements of this article.
- (9) Maintain all records pertaining to the provisions of this article in the office of the administrator and provide for such records to be open for public inspection. Permits issued under the provisions of this article shall be maintained in a separate file or marked for expedited retrieval within combined files.
- (10) A final finished construction elevation certificate (FEMA Form 086-0-33, or most current version thereof) is required after construction is completed and prior to certificate of compliance/occupancy issuance. It shall be the duty of the permit holder to submit to the floodplain administrator a certification of final as-built construction of the elevation of the reference level and all attendant utilities. The floodplain administrator shall review the certification data submitted. Deficiencies detected by such review shall be corrected by the permit holder immediately and prior to certificate of compliance/occupancy issuance. In some instances, another certification may be required to certify corrected as-built construction. Failure to submit the certificate of compliance/occupancy. The finished construction elevation certificate certifier shall, at a minimum, comply with the FEMA instructions for completing the elevation certificate provide at least two photographs showing the front and rear of the building taken within 90 days from the date of certification. The photographs

must be taken with views confirming the building description and diagram number provided in Section A of the form. To the extent possible, these photographs should show the entire building including foundation. If the building has split-level or multi-level areas, provide at least two additional photographs showing side views of the building. In addition, when applicable, provide a photograph of the foundation showing a representative example of the flood openings or vents. All photographs must be in color and measure at least three inches by three inches. Digital photographs are acceptable.

(Ord. No. 2009-13, § 3, 1-25-2010; Ord. No. 2019-09-, § 3, 10-28-2019; Ord. No. 2021-05-, § 3, 2-22-2021)

Sec. 56-78. Permit procedures.

- (a) Application for a development permit shall be made to the administrator on forms furnished by the city prior to any development activities within a special flood hazard area. The development permit application requirements shall include, but are not limited to, the following: plans in duplicate drawn to scale and prepared by a Tennessee registered licensed land surveyor or professional engineer, showing the nature, location, dimensions, and elevations of the area in question, existing or proposed structures, earthen fill placement, storage of materials or equipment, and drainage facilities. The requirements herein shall be in addition to any and all requirements for development permits that may be imposed pursuant to other provisions of this Code. The following information is specifically required for permits for development within areas of special flood hazard areas:
 - (1) Application stage.
 - a. Proposed elevation in relation to mean sea level<u>NAVD88</u>, or height above the highest adjacent grade, where applicable, of the proposed lowest floor, including basement, of all buildings where base flood elevations are available.
 - b. Description of the extent to which any watercourse will be altered or relocated as a result of proposed development. For projects proposing to alter or relocate a portion of a watercourse, the application must include:
 - 1.Notification of adjacent communities and the Tennessee Emergency Management AgencyState NFIP Office of the extent of the proposed alteration or relocation of the watercourse.
 - 2. Hydrologic and hydraulic analyses performed in accordance with standard engineering practices demonstrating that:
 - (i) The flood carrying capacity within any altered or relocated portion of the watercourse is maintained.
 - (ii) The cumulative effect of the proposed alteration or relocation within the floodway, including floodways established per subsection (a)(1)c. of this section, shall not result in any increase (0.00') in the water surface elevation of the base flood during the occurrence of a base flood discharge at any point within the city.
 - (iii) These analyses shall be certified by a Tennessee licensed professional engineer, and include all supporting technical data and certification that the requirements of this subsection have been met, using the same methodologies as in 44 CFR 60.3(d)(3).
 - 3. In lieu of meeting the requirements of subsection (a)(1)b.2(ii) of this section, a CLOMR submitted in accordance with 44 CFR 60.3(d)(4) and 65.12, and approved by FEMA, provided that:

- (i) The administrator shall be satisfied that the impacts demonstrated by hydrologic and hydraulic analyses performed in accordance with standard engineering practices, and certified by a Tennessee licensed professional engineer, do not adversely impact adjacent properties.
- (ii) The complete CLOMR application is reviewed and approved by the administrator prior to submittal to FEMA.
- (iii) All subsequent data submitted to FEMA, prior to approval of the CLOMR by FEMA, is submitted to the administrator.
- c. For any location within a special flood hazard area where base flood elevation data is not initially available, <u>including areas designated zone A on the community's FIRM</u>, or where the floodway has not been delineated, a Tennessee <u>registered licensed professional</u> engineer shall determine the base flood elevation and establish the limits of the regulatory floodway. The engineer's certification shall be submitted with the permit application.
- d. In order to determine if improvements or damage meet the substantial improvement or substantial damage criteria, the applicant shall provide to the floodplain administrator a detailed cost to repair all damages and/or cost of improvements which includes the complete costs associated with all types of work necessary to completely repair or improve a building. These include the costs of all materials, labor, and other items necessary to perform the proposed work. These must be in the form of:
 - 1. An itemized cost of materials, and labor, or estimates of materials and labor, that are prepared by licensed contractors or professional construction cost estimators.
 - 2. Building valuation tables published by building code organizations and cost-estimating manuals and tools available from professional building cost-estimating services.
 - 3. A qualified estimate of costs that is prepared by the local official using professional judgement and knowledge of local and regional construction costs.
 - 4. A detailed cost estimate provided and prepared by the building owner. This must include as much supporting documentation as possible (such ase.g., pricing information from lumber companies, plumbing and electrical suppliers, etc.). In addition, the estimate must include the value of labor, including the value of the owner's labor.
- <u>e.</u> For projects proposing to enclose areas below elevated buildings, construct an attached garage or storage room, or construct a detached garage or accessory structure, include signed
 <u>Declaration of Land Restriction (Nonconversion Agreement); the agreement shall be recorded by</u> the owner on the property deed prior to certificate of compliance/occupancy issuance.
- (2) Construction stage.
 - a. Within AE zones, where base flood elevation data is available, any lowest floor certification made relative to mean sea level shall be prepared by or under the direct supervision of, a Tennessee registered land surveyor and certified by same. The administrator shall record the elevation of the lowest floor on the development permit.
 - **ba**. Elevation of the lowest floor relative to mean sea levelNAVD88, as determined by or under the direct supervision of, a Tennessee registered-licensed land surveyor and certified by a Tennessee licensed registered-land surveyor, to be provided upon completion of the foundation. Should the elevation of the lowest floor be lower than the proposed elevation on the approved permit, construction shall be discontinued until corrective action has been taken or the administrator is

otherwise satisfied that the lowest floor elevation will comply with the provisions of this article. The administrator shall record the elevation of the lowest floor on the development permit.

- eb. For all new construction and substantial improvements, the permit holder shall provide to the administrator a final finished construction elevation certificate (FEMA Form 086-033). A final finished construction elevation certificate is required after construction is completed and prior to certificate of compliance/occupancy issuance. It shall be the duty of the permit holder to submit to the floodplain administrator a certification of final as-built construction of the elevation of the reference level and all attendant utilities. The administrator will keep the certificate on file in perpetuity.
- <u>c.</u> Where filling has been permitted for a new subdivision, a post-construction LOMR-F shall be submitted to the administrator after construction is complete. The final plat shall not be recorded until the administrator receives a copy of the LOMR-F as approved by FEMA. In lieu of a LOMR-F, a copy of a LOMR, as approved by FEMA, may be provided.
- <u>d.</u> For all projects altering or relocating a watercourse, a post-construction LOMR shall be submitted to the administrator after construction is complete, per section 56-77(4) and in accordance with 44 CFR 65.3. A portion of the performance security instrument held by the city for a subdivision or other new development shall be maintained, in an amount to be determined by the administrator, until the administrator receives a copy of the LOMR as approved by FEMA.
- (b) Any work undertaken prior to submission of any required engineer's certification shall be at the permit holder's risk. The administrator shall review the above-referenced certification data. Deficiencies detected by such review shall be corrected by the permit holder immediately and prior to further work being allowed to proceed. Failure to submit the certification or failure to make said corrections required hereby shall be cause to issue a stop-work order for the project.

(Ord. No. 2009-13, § 3, 1-25-2010; Ord. No. 2019-09-, §§ 4, 5, 10-28-2019; Ord. No. 2021-05-, §§ 4, 5, 2-22-2021)

Secs. 56-79, 56-80. Reserved.

DIVISION 5. PROVISIONS FOR FLOOD HAZARD REDUCTION

Sec. 56-81. General standards.

In all areas of special flood hazard areas, the following provisions are required:

- (1) New construction and substantial improvements shall be anchored to prevent flotation, collapse and lateral movement of the structure.
- (2) Manufactured homes shall be installed using methods and practices that minimize flood damage. They must be elevated and anchored to prevent flotation, collapse and lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable state and local anchoring requirements for resisting wind forces.
- (3) New construction and substantial improvements shall be constructed with materials and utility equipment resistant to flood damage.
- (4) New construction and substantial improvements shall be constructed by methods and practices that minimize flood damage.

- (5) All electrical, heating, duct-work, ventilation, plumbing, air conditioning equipment and other service facilities shall be elevated at or above the regulatory flood protection elevation. Where underground service or feeder conductors are supplied to the structure, a conduit(s) for the main service from the ground to the structure is permitted so long as it is water-tight and extends continuously from the ground to a point above the regulatory flood protection elevation.
- (6) New and replacement water supply systems shall be designed to minimize or eliminate infiltration of floodwaters into the system.
- (7) New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of floodwaters into the systems and discharges from the systems into floodwaters.
- (8) On-site waste disposal systems shall be located and constructed to avoid impairment to them or contamination from them during flooding.
- (9) Any alteration, repair, reconstruction or improvements to a building that is in compliance with the provisions of this article shall meet the requirements of "new construction" as contained in this article.
- (10) Any alteration, repair, reconstruction or improvements to a building that is not in compliance with the provisions of this article shall be undertaken only if said nonconformity is not further extended or replaced.
- (11) All new construction and substantial improvement proposals shall include <u>and provide</u> copies of all necessary federal and state permits, including Section 404 of the Federal Water Pollution Control Act amendments of 1972, 33 U.S.C. 1334.
- (12) All subdivision proposals and other proposed new development proposals shall meet the standards of section 56-82.
- (13) When proposed new construction and substantial improvements are partially located in an area of special flood hazard area, the entire structure shall meet the standards for new construction in a <u>special flood hazard area</u>.
- (14) When new construction and substantial improvements are proposed for a location that lies in multiple special flood hazard risk-area zones or in a special flood hazard risk-area zone with multiple base flood elevations, the entire structure shall meet the standards for the most hazardous special flood hazard risk-area zone and the highest base flood elevation.
- (15) Proposals for new construction, substantial improvements, subdivisions and other new developments, including manufactured home parks, shall be reviewed to determine whether such proposals will be reasonably safe from flooding and that compliance with the above provisions of this section will be achieved. All such proposals shall meet the following standards:
 - a. Each proposal shall be consistent with the need to minimize flood damage.
 - b. Each proposal shall have public utilities and facilities, such as sewer, gas, electrical and water systems, located and constructed to minimize or eliminate flood damage.
 - c. Each proposal shall have adequate drainage provided to reduce exposure to flood hazards.
 - d. Each proposal shall include base flood elevation data. (See section 56-78.)
 - e. Subdivision proposals shall not contain special flood hazard areas within the buildable area of the lots.
- (16) The final plat shall not be recorded until the administrator receives a copy of the LOMR-F, as approved by FEMA, where required by section 56 78(a)2.

- (17) A portion of the performance security instrument held by the city for a subdivision or other new development shall be maintained, in an amount to be determined by the administrator, until the administrator receives a copy of the LOMR-FLOMR as approved by FEMA, where required by section 56-78(a)2.
- (178) All elevation and floodproofing requirements required of this article must be certified by a Tennessee licensed land surveyor. The certification must be on the most current FEMA formelevation certificate.
- (19) All floodproofing requirements required of this article must be certified by a Tennessee licensed professional engineer or architect. The certification must be on the most current FEMA floodproofing certificate.

(Ord. No. 2009-13, § 3, 1-25-2010; Ord. No. 2019-09-, § 6, 10-28-2019; Ord. No. 2021-05-, § 6, 2-22-2021)

Sec. 56-82. Specific standards for areas other than the floodway.

In all areas of special flood hazard areas other than the floodway, the following provisions, in addition to those set forth in section 56-81, shall apply:

- (1) <u>Residential or nonresidential Buildingsbuildings</u>.
 - In areas where base flood elevation data is available, new construction and substantial improvement of any nonresidential (including commercial, industrial and institutional) or residential building (or manufactured home), or horizontal addition to such buildings, may be permitted, provided that the lowest floor, including basement, shall be elevated to no lower than two-three feet above the base flood elevation.
 Exception: For any nonresidential (including commercial, industrial and institutional) or

residential building (or manufactured home) which was permitted as new construction or substantial improvement after January 16, 2003, but prior to ordinance adoption date, and for which it is demonstrated that the lowest floor, including basement, is no lower than two feet above the base flood elevation, substantial improvement may be permitted without requiring the lowest floor, including basement, be elevated to no lower than three feet above the base flood elevation.

Solid foundation perimeter walls or piers may be used to elevate a structure, provided that:

- 1. The height of any perimeter wall used to elevate a building shall not exceed seven and onehalf feet, measured from the lowest adjacent grade to the lowest floor, and oOpenings sufficient to facilitate equalization of flood hydrostatic forces on both sides of exterior walls shall be provided in accordance with subsection (2) of this section.
- 2. The minimum number of piers necessary to structurally support the building shall be used, and piers shall be designed to provide the least resistance to the flow of water.
- 3. When the height of the building is elevated greater than seven and one-half feet, measured from the lowest adjacent grade to the lowest floor, a front wall façade with flood vents may be added in conjunction with piers used to support the structure. The number, size and location of vents must be approved by the administrator. The sides and rear of the structure may not be enclosed, and the building must be supported by the minimum number of piers to support the structure. For the purpose of this section, the front of the structure will be the elevation facing the street and parallel to the front building setback line.

- 43. In no event shall the elevated height of any residential building exceed 52 feet as measured from the highest point of the roof to the lowest adjacent grade.
- b. Within special flood hazard areas where base flood elevations have not been established, or where no floodways have been designated, no construction may be permitted until a Tennessee registered-licensed professional engineer has determined the base flood elevation and established the limits of the regulatory floodway. This information must be submitted to FEMA through a letter of map revision. Once the base flood elevation and floodway location have been established in accordance with standard engineering practices, construction shall comply with the building elevation requirements set forth in subsection (1)a. of this section.
- (2) Enclosures below the lowest floor. All new construction and substantial improvements that include fully or partially Enclosed enclosed areas formed by foundation and walls below the lowest floor shall be designed to allow for the entry and exit of floodwaters to automatically equalize hydrostatic flood forces on exterior walls.
 - a. Designs for complying with this requirement must either be certified by a Tennessee <u>licensed</u> professional engineer or architect or meet or exceed the following minimum criteria:
 - 1. A minimum of two openings shall be provided, <u>on at least two exterior walls</u>, having a total net <u>open</u> area of not less than one square inch for every square foot of enclosed area subject to flooding.
 - 2. The bottom of all openings shall be no higher than one foot above the <u>higher of the</u> <u>exterior or interior</u> finished grade <u>or floor immediately below the opening</u>.
 - 3. Openings may be equipped with screens, louvers, valves or other coverings or devices, provided they permit the automatic flow of floodwaters in both directions.
 - b. <u>A Declaration of Land Restriction (Nonconversion Agreement) shall be recorded by the property</u> <u>owner for The enclosed areas thatshall not exceed seven and one-halffour</u> feet in height, measured from the lowest adjacent grade to the top of lowest floor.
 - c. The interior portion of such enclosed area may be used <u>solely</u> for <u>parking</u>, building access or storage, but shall not be finished or partitioned into separate rooms in such a way as to impede the movement of floodwaters. Any partitions shall comply with the provisions of this section. The floor shall not be finished and must remain a pervious material.
- (3) Garages, storage rooms, and accessory buildings. Attached garages, attached storage rooms, and accessory buildings (including detached garages), whose floor is less than the regulatory flood protection elevation, shall be designed to allow for the entry and exit of floodwaters to automatically equalize hydrostatic flood forces on exterior walls.
 - a. Designs for complying with this requirement shall comply with the requirements set forth in subsection (2)a. of this section.
 - b. A Declaration of Land Restriction (Nonconversion Agreement) shall be recorded by the property owner for any enclosed area in excess of 200 sq. ft.
 - c. The interior portion of such enclosed area shall comply with the requirements set forth in subsection (2)c. of this section.
 - d. Accessory buildings (including detached garages) shall also comply with the requirements set forth in Sec. 78-22. Any livable space, as permitted by Sec. 78-22, shall comply with the requirements set forth in subsection (1) of this section.

Brentwood, Tennessee, Code of Ordinances (Supp. No. 52)

Chapter 56 STORMWATER MANAGEMENT, EROSION CONTROL AND FLOOD DAMAGE PREVENTION

- (<u>34</u>) Standards for manufactured homes and recreational vehicles.
 - a. All manufactured homes must meet all the requirements for new construction, whether placed or substantially improved:
 - 1. On individual lots or parcels; or
 - 2. In new, and substantially improved, existing, and expansions to existing manufactured home parks or subdivisions.
 - b. All manufactured homes placed or substantially improved on an individual lot or parcel or in a manufactured home park or subdivision must be elevated so that the lowest floor of the manufactured home lies on a permanent foundation no lower than two-three feet above the level of the base flood elevation or three feet above the highest adjacent grade, whichever is higher.

Exception: For any manufactured home which was permitted as new construction or substantial improvement after January 16, 2003, but prior to [ordinance adoption date], and for which it is demonstrated that the lowest floor lies on a permanent foundation no lower than two feet above the base flood elevation, substantial improvement may be permitted without requiring the lowest floor be elevated to no lower than three feet above the base flood elevation or three feet above the highest adjacent grade.

- c. Any manufactured home which has incurred "substantial damage" as the result of a flood must meet the standards of this division.
- d. All manufactured homes must be securely anchored to an adequately anchored foundation system to resist flotation, collapse and lateral movement.
- e. All recreational vehicles placed in an identified special flood hazard area must either:
 - 1. Be on the site for fewer than 180 consecutive days;
 - 2. Be fully licensed and ready for highway use (a recreational vehicle is ready for highway use if it is licensed, on its wheels or jacking system, attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached structures or additions); or
 - 3. The recreational vehicle must mMeet all requirements for new construction.
- (4<u>5</u>) *Compensatory cut and fill.*
 - a. Engineered fill may be permitted at locations outside the floodway. The volume of material shall be based upon an equal cut/fill quantity, so that the total amount of fill material added shall equal the amount of material removed. The location of the cut must be hydraulically connected to the location of the fill, and the location of the cut must have a base flood elevation no lower than the base flood elevation of the location of the fill, unless hydrologic and hydraulic analyses performed in accordance with standard engineering practices and certified by a Tennessee licensed professional engineer is provided, demonstrating that an alternate location of the cut will not result in any increase (0.00') in the water surface elevation of the base flood during the occurrence of a base flood discharge at any point within the city. For lots governed by the Subdivision Regulations of the City of Brentwood, The-the building pad for each affected lot shall be filled to an elevation that equals or exceeds the regulatory flood protection elevation at that location. Approval for filling may be granted only if the administrator determines that the fill material will not unduly increase flood damage potential, and that the amount and dimensions of

Page 34 of 41

Chapter 56 STORMWATER MANAGEMENT, EROSION CONTROL AND FLOOD DAMAGE PREVENTION

fill material in any location is not greater than is necessary to achieve the purpose of the fill as demonstrated in the plan submitted by the applicant.

- b. In granting approval to fill property within the special flood hazard area, the administrator shall require that <u>precautions-measures</u> be taken against erosion through the use of rip-rap, vegetative cover, bulk heading, or other suitable means.
- c. Prior to the issuance of a development permit, the applicant shall secure a CLOMR-F from FEMA authorizing the proposed alterations to the special flood hazard area.
- dc. Where filling has been permitted on a platted lot, an as-built survey showing compliance with this division must be submitted to the administrator before a building permit will be issued. A copy of the LOMR-F, as approved by FEMA, must be submitted to the administrator before a certificate of occupancy will be issued.
- ed. Where filling has been permitted for a new subdivision, an as-built survey showing compliance with this division must be submitted to the administrator before the final plat is recorded. A copy of the LOMR-F, as required by subsection 56-78(a)(2)c, as approved by FEMA, must be submitted to the administrator before the final plat is recorded the performance security is released.
- (56) Private utility facilities. In lieu of elevation, private utility facilities, including heating and air conditioning equipment and pool equipment, may be floodproofed and located and designed so as to minimize or eliminate flood damage. The administrator shall require certification by a Tennessee licensed registered professional engineer or architect that the floodproofing, location and/or design of the utility facilities are in accordance with accepted standards of practice for meeting the provisions of this article.
- (67) Fences. With the approval of the administrator, fences may be erected at any location within the special flood hazard area other than the floodway, provided that <u>the fence is an open fence in</u> <u>compliance with Sec. 78-10 and</u> the administrator shall be satisfied that the fence is designed so as not to interfere with the flow of floodwaters.

(Ord. No. 2009-13, § 3, 1-25-2010; Ord. No. 2019-09-, § 7, 10-28-2019; Ord. No. 2021-05-, §§ 7, 8, 2-22-2021)

Sec. 56-83. Special standards for floodways.

Located within the special flood hazard areas established in section 56-64 are areas designated as floodways. A floodway may be an extremely hazardous area due to the velocity of floodwaters, debris or erosion potential. In addition, the area must remain free of encroachment in order to allow for the discharge of the base flood without increased flood heights and velocities. Therefore, the following provisions shall apply in addition to general standards set forth in this article:

- (1) Except as otherwise permitted in subsections (2), (3), (4), (5), and (6), and (7) below, encroachments are prohibited within the floodway, including: earthen fill material; new construction; substantial improvements; decks or above-grade patios outside the existing building footprint; manufactured homes or recreational vehicles; and any other development.
- (2) Fences on lots of three or more acres in size may be permitted, provided that:
 - a. The lot is three or more acres in size and is being utilized for an agricultural use related to animal husbandry,
 - b. The fence is an open fence in compliance with Sec. 78-10,

Brentwood, Tennessee, Code of Ordinances (Supp. No. 52)

<u>c.</u><u>it-It</u> is demonstrated through hydrologic and hydraulic analyses performed in accordance with standard engineering practices that the cumulative effect of the proposed fence encroachments shall not result in any increase (0.00') in the water surface elevation of the base flood, velocities or floodway widths during the occurrence of a base flood discharge at any point within the city. The property owner shall submit certification from a Tennessee <u>licensed registered</u> professional engineer that the requirements of this subsection have been met, along with supporting technical data, using the same methodologies as in 44 CFR 60.3(d)(3).

- d.When substantial repair (greater than 50 percent rebuilding) of any existing fence not
conforming to the provisions of this section and Sec. 78-10 is needed, including fences partially
within the floodway, the portion of the existing fence within the floodway shall be completely
removed and not replaced, and
- e. The fences shall be completely removed within one year of the lot no longer being utilized for an agricultural use related to animal husbandry.
- (3) Elevating the existing footprint of a building per the requirements of section 56-82 (1) and (2). The elevation of an existing building shall only be permitted, provided that if:
 - a. The building, including additions or above-grade patios, shall be limited to the existing footprint,
 - b. The building shall comply with the requirements set forth in section 56-82(1) and (2),
 - c. The height of any perimeter wall used to elevate a building shall not exceed four feet, measured from the lowest adjacent grade to the top of lowest floor,
 - d. The minimum number of piers necessary to structurally support the building shall be used, and piers shall be designed to provide the least resistance to the flow of water,
 - e. When the height of the building is elevated greater than four feet, measured from the lowest adjacent grade to the top of lowest floor, a single front wall façade with flood vents may be added in conjunction with piers used to support the structure. The number, size and location of vents must be approved by the administrator. The sides and rear of the structure may not be enclosed, and the building must be supported by the minimum number of piers to support the structure. For the purpose of this section, the front of the structure will be the elevation facing the street and parallel to the front building setback line, and
 - f. -iIt is demonstrated through hydrologic and hydraulic analysis performed in accordance with standard engineering practices that their cumulative effect, when combined with all other existing and anticipated development, shall not result in any increase (0.00') to the water surface elevation of the base flood, velocities or floodway widths during the occurrence of a base flood discharge at any point within the community. Certification thereof by a Tennessee licensed registered professional engineer, along with supporting technical data, shall be provided to the administrator before construction or placement may be initiated. Additions or above-grade patios outside of the existing building footprint are prohibited.
- (4) For an elevated building that complies with or has been permitted to comply with the elevation requirements set forth outlined in subsection (3) of this section Chapter 56, Article II, a deck that has its finished floor at least two-three feet above the 100-year flood elevation may be allowed. Any deck permitted pursuant to this subsection shall not have a roof or walls (including, but not limited to, glass or screens) and must be attached to the building and located in the rear buildable area of the lot. For a building with an existing outdoor roofed area, the existing roof may remain, provided the roof is completely connected to the building and is elevated with the building, as-is. The existing roof may cover any deck permitted pursuant to this subsection, provided that it includes a signed Declaration of

Brentwood, Tennessee, Code of Ordinances (Supp. No. 52)

Land Restriction (Nonconversion Agreement); the agreement shall be recorded by the property owner on the property deed prior to certificate of compliance/occupancy issuance. For existing roofs not located in the rear buildable area of the lot, a deck may be permitted outside of the rear buildable area, provided the deck is within the footprint of the existing roof only. Safety railings no taller than 48 inches are allowed on top of the surface perimeter of the deck. Such permitted deck may only have the minimum ingress and egress to comply with the adopted building code. The deck must be open underneath, and the minimum number of piers or columns necessary to structurally support the deck shall be used. The piers or columns shall be designed to provide the least resistance to the flow of water. The support system for the deck must be designed by a Tennessee registered-licensed professional engineer. For any deck with ground supports, landings, or stairs that touch the ground or extend below the 100-year flood elevation, a no-rise (0.00') certification must be provided by a Tennessee licensed registered professional engineer. All other jurisdictional permits, design and placement requirements per the adopted building and municipal codes apply.

- (5) For an elevated building that complies with or has been permitted to comply with the elevation requirements set forth outlined in subsection (3) of this section Chapter 56, Article II, a porch that has its finished floor at least two-three feet above the 100-year flood elevation may be allowed. Any porch permitted pursuant to this subsection may have a roof but may not have walls (including, but not limited to, glass or screens) and must be attached at the front entrance to the building and located in the front buildable area of the lot. Safety railings no taller than 48 inches are allowed on top of the surface perimeter of the porch. Such permitted porch shall have a maximum footprint area equivalent to be no longer than twenty-five percent (25%) of the front facade length of the home and no deeper than eight (8) feet beyond the average front plane of the house. Stairs leading to such porch may not be larger than six (6) feet wide and one (1) foot deep; however, intermediate landings connecting two or more flights of straight stairs may be allowed provided they are no larger than six (6) feet x six (6) feet or 36 square feet. The porch, landing, and stairs must be open underneath, and the minimum number of piers or columns necessary to structurally support the porch, landing, and stairs shall be used. A front wall façade may be added but the sides must remain open. For the purposes of this subsection, the front of the porch, landing, and stairs will be deemed to be the elevation facing the street and parallel to the front building setback line. A no-rise (0.00') certification must be provided by a Tennessee licensed registered professional engineer. All other jurisdictional permits, design and placement requirements per the adopted building and municipal codes apply. Existing porches and landings that are larger than the limitations provided herein can remain when a building is elevated, but they cannot be enlarged.
- (6) Nonsubstantial vertical additions to existing dwellings and nonsubstantial interior renovations within the existing building footprint may be permitted.
- (7) The construction or placement of certain structures, facilities and improvements identified below may be permitted by the administrator. Except where otherwise permitted by subsection 56-78(a)(1)b, Such such structures, facilities and improvements shall only be permitted if it is demonstrated through hydrologic and hydraulic analysis performed in accordance with standard engineering practices that their cumulative effect, when combined with all other existing and anticipated development, shall not result in any increase (0.00') to the water surface elevation of the base flood, velocities or floodway widths during the occurrence of a base flood discharge at any point within the community. Certification thereof by a Tennessee licensed registered professional engineer, along with supporting technical data, shall be provided to the administrator before construction or placement may be initiated. Structures, facilities and improvements permitted under these provisions shall be limited to:
 - a. Roads, sidewalks, bicycle/pedestrian paths and associated signs.

Chapter 56 STORMWATER MANAGEMENT, EROSION CONTROL AND FLOOD DAMAGE PREVENTION

- b. Drainage structures, including but not limited to bridges and culverts.
- c. Other public infrastructure needs, including public utilities.
- d. Parks and recreational facilities, including but not limited to open shelters, basketball courts and athletic fields.
- e. Driveways and parking areas.

(Ord. No. 2009-13, § 3, 1-25-2010; Ord. No. 2019-09-, § 8, 10-28-2019)

Secs. 56-84, 56-85. Reserved.

Sec. 56-86. Standards for unmapped streams.

Located within the city are unmapped streams where areas of special flood hazard areas are neither indicated nor identified. Adjacent to such streams, the following provisions shall apply:

- (1) No encroachments, including fill material, or structures, or other development, shall be located within an area of at least twice the width of the stream, measured from the top of each stream bank, unless <u>hydrologic and hydraulic analyses performed in accordance with standard engineering practices and certification certified</u> by a Tennessee registered licensed professional engineer is provided, demonstrating that the cumulative effect of the proposed development, when combined with all other existing and anticipated development, will not result in any increase (0.00') in the water surface elevation of the base flood <u>during the occurrence of a base flood dischargemore than one foot</u> at any point within the city.
- (2) If the stream and the adjacent area are subsequently identified as a special flood hazard area, all development, including new construction and substantial improvements, shall meet the standards established in accordance with divisions 4 and 5 of this article.

(Ord. No. 2009-13, § 3, 1-25-2010)

Sec. 56-87. Requirements for shallow flooding areas (Zone AO).

Located within the special flood hazard areas established in division 3, section 56-64, are areas designated as shallow flooding areas. These areas, <u>designated zone AO on the community's FIRM</u>, have special flood hazards associated with base flood depths of one to three feet where a clearly defined channel does not exist and where the path of flooding is unpredictable and indeterminate. In addition to the requirements of division 5, sections 56-81, 56-82 and 56-83, all new construction, and substantial improvements shall meet the following requirements:

- (1) The lowest floor (including basement) shall be elevated at least as high as the depth number specified on the flood insurance rate map (FIRM), in feet, plus a freeboard of two-three feet above the highest adjacent grade; or at least three five feet above the highest adjacent grade, if no depth number is specified.
- (2) Adequate drainage paths shall be provided around structures on slopes, to guide floodwaters around and away from proposed structures.

(-Ord. No. 2021-05-, § 9, 2-22-2021)

Sec. 56-88. Requirements for shallow flooding areas (Zone AH) Drainage paths.

Located within the special flood hazard areas established in division 3, section 56-64, are areas designed designated as shallow flooding areas. These areas, designated zone AH on the community's FIRM, are subject to inundation by one-percent-annual-chance shallow flooding (usually areas of ponding) where average depths are one to three feet. Base flood elevations are derived from detailed hydraulic analyses are shown in this zone. In addition to meeting the requirements of division 5, sections 56-81, 56-82 and 56-83, all new construction and substantial improvements shall meet the following requirements:

(1) Adequate drainage paths shall be provided around structures on slopes, to guide floodwaters around and away from proposed structures.

(-Ord. No. 2021-05-, § 10, 2-22-2021)

Secs. 56-89. Standards for areas protected by flood protection system (A-99 Zones).

Located within the special flood hazard areas established in division 3, section 56-64, are areas designated as protected by a flood protection system but where base flood elevations have not been determined. These areas, designated zone A-99 on the community's FIRM, shall meet the requirements and standards established in accordance with divisions 4 and 5 of this article.

Sec., 56-90. Reserved.

DIVISION 6. VARIANCES AND APPEALS

Sec. 56-91. Board of building construction appeals authority.

The city's board of building construction appeals, established pursuant to chapter 14 of this Code, shall have the following powers in addition to those set forth in chapter 14:

- (1) Administrative review. To hear and decide appeals where it is alleged by the appellant that there is error in any order, requirement, permit, decision, determination, or refusal made by the administrator or other administrative official of the city in carrying out or enforcing any terms of this article.
- (2) *Variances.* To hear and decide upon applications for variance from the terms of this article.

(Ord. No. 2009-13, § 3, 1-25-2010)

Sec. 56-92. Procedures.

(a) Appeals and variance requests—How taken. An appeal to the board of building construction appeals may be taken by any person, firm or corporation aggrieved or by any governmental officer, department or bureau affected by any decision of the administrator based in whole or in part upon the provisions of this article. A request for variance may be submitted by any party owning an interest in property which is affected by the provisions of this article. Such appeal or request for variance shall be taken by filing with the board of building construction appeals a notice of appeal, specifying the grounds thereof, and paying the required fee established in this section. An appeal from a decision of the administrator must be filed within 30 days from the time the decision is rendered. The administrator shall transmit to the board of building construction appeals shall fix a reasonable time for the hearing of the appeal, give public notice thereof, as well as due notice to parties in interest and decide the same within a reasonable time, which shall not be more than 35 days from the date of the hearing; provided, however, that the party bringing the appeal may

consent to an extension of time for the board's decision. At the hearing, any person or party may appear and be heard in person or by agent or by attorney.

- (b) Fees. In all cases where an appeal or request for variance is made by a property owner or other interested party, a fee of \$200.00 dollars shall be paid by the appellant. Such fee shall be refundable if the board of building construction appeals rules in the appellant's favor in an administrative review case. No refund shall be issued to a party who has requested a variance.
- (c) Meetings. Meetings of the board of building construction appeals to consider appeals and variances in regard to this article shall be held in accordance with the board's adopted meeting schedule, or at such other times as the board shall determine, and shall be conducted in accordance with the board's adopted rules of procedure. All meetings of the board of building construction appeals shall be open to the public. The administrator shall keep records of applications for appeals and variances and determinations made by the board of building construction appeals, which shall be a public record. Upon request by FEMA, the administrator shall report any variances granted.

(Ord. No. 2009-13, § 3, 1-25-2010; Ord. No. 2019-09-, § 9, 10-28-2019)

Sec. 56-93. Conditions for variances.

- (a) In reviewing applications for variances, the board of building construction appeals shall consider all technical evaluations, all relevant factors, and all standards specified in other sections of this division. Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood discharge would result. Variances from the provisions of this article may be granted by the board of building construction appeals only upon:
 - (1) A showing of good and sufficient cause; and
 - (2) A determination that:
 - a. The variance is the minimum relief necessary, considering the flood hazard and each of the factors listed in subsection (b) of this section;
 - b. Failure to grant the variance would result in exceptional hardship; and
 - c. The granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense; create nuisance; cause fraud on or victimization of the public; or conflict with existing local laws or divisions.
- (b) In addition to the general determinations set forth in subsection (a) above, the board of building construction appeals shall consider each of the following factors in considering a request for a variance from the provisions of this article:
 - (1) The danger that materials may be swept onto other property to the injury of others;
 - (2) The danger to life and property due to flooding or erosion;
 - (3) The susceptibility of the proposed facility and its contents to flood damage;
 - (4) The importance of the services provided by the proposed facility to the community;
 - (5) The necessity of the facility to a waterfront location, in the case of a functionally dependent use;
 - (6) The availability of alternative locations, not subject to flooding or erosion damage, for the proposed use;

- (7) The relationship of the proposed use to the comprehensive plan and floodplain management program for that area;
- (8) The safety of access to the property in times of flood for ordinary and emergency vehicles;
- (9) The expected heights, velocity, duration, rate of rise and sediment transport of the floodwaters and the effects of wave action, if applicable, expected at the site; and
- (10) The costs of providing governmental services during and after flood conditions including maintenance and repair of public utilities and facilities such as sewer, gas, electrical, water systems, and streets and bridges.
- (c) When a variance is requested for the repair or rehabilitation of a historic structure as defined herein, each of the requirements set forth above shall apply. In addition, prior to granting a variance for the repair or rehabilitation of a historic structure, the board of building construction appeals shall determine that the proposed repair or rehabilitation will not preclude the structure's continued designation as a historic structure, and that the variance is the minimum necessary deviation from the requirements of this article to preserve the historic character and design of the structure. Each request for a variance for the repair or rehabilitation of a historic structure shall be referred to the city's historic commission for a recommendation prior to consideration by the board of building construction appeals.
- (d) Upon consideration of the factors listed above, and the purposes of this division, the board of building construction appeals may attach such additional conditions to the granting of variances as it deems necessary to effectuate the purposes of this division.
- (e) Any applicant to whom a variance is granted shall be given written notice that the issuance of a variance to construct a structure below the base flood elevation will result in increased premium rates for flood insurance (as high as \$25.00 for \$100.00) coverage, and that such construction below the base flood elevation increases risks to life and property.
- (f) The administrator shall maintain the records of all appeal actions and report any variances to FEMA upon request.

Resolution 2023-57 - Direction to City Staff Regarding Negotiations with Williamson County on an Interlocal Agreement Concerning Development of an Indoor Racquet Facility in Crockett Park

Background

Since the 2020 announcement of the planned closure of the Maryland Farms YMCA, there has been considerable community concern and discussion regarding the significant loss of tennis court capacity. Over the past several months, City staff have been in conversations with Williamson County Parks and Recreation staff regarding the potential for a joint project to develop an indoor racquet facility in Crockett Park that would include both tennis and pickleball courts. In addition, the topic has been discussed in several recent City Commission work sessions.

During these work session discussions, staff have been unable to obtain clear direction from a majority of the commission on the preferred path forward. This includes such fundamental issues as whether to partner with the County and, if we do partner with the County, what is the expectation regarding priority access for Brentwood residents at a new joint City/County facility. Without clarity and consensus on these fundamental items, staff cannot move this project forward.

The attached resolution seeks Commission direction on how to proceed with this project. As drafted, the resolution would authorize staff to proceed with formal negotiations for preparation of an interlocal agreement between the City and Williamson County on development of an indoor racquet facility on city-owned land in Crockett Park. Attached to the resolution is a proposed list of terms that are intended to be the priorities for the City in negotiation of the interlocal agreement. The primary terms on this include:

- 1. The partnership agreement would be similar to the existing indoor soccer facility in Crockett Park. The property and structure would be owned by the City but operated by the County under a long-term lease with the County assuming all responsibility for operations including utilities and routine cleaning, maintenance, etc.
- 2. Maximum project budget of \$12 million with a 50/50 cost share between Brentwood and Williamson County. This includes all site development and utility-related costs necessary for construction.

- 3. The City will be the contracting agency for design and construction and will waive all associated city permit fees except water and sewer capacity/tap fees.
- 4. The County will establish a system to account for the financial operations of the facility separately from all other County park operations so that net revenues from facility operations can accurately be determined.
- 5. A net revenue sharing arrangement shall be established based on the initial 50/50 cost share formula.
- 6. The County shall create a dedicated capital maintenance fund for this facility and an agreed upon amount of annual revenue shall be set aside (prior to revenue sharing calculation/distribution) for major maintenance such as bubble replacement, HVAC replacement, etc. Funds in this capital maintenance fund shall only be used for maintenance projects at the indoor racquet facility and not in any other Williamson County park facility. Any use of funds from this capital maintenance fund shall be agreed to by both parties.
- 7. Scheduling and operation of the facility must provide for a reservation system that ensures Brentwood residents have first priority access to 50% of available clinic and court contract reservation time. The specific details of the Brentwood priority reservation system shall be included as part of the final interlocal agreement to be approved by each governing body.

If the attached resolution is approved, staff will proceed with negotiations in hopes presenting a proposed interlocal agreement for formal consideration by the Board of Commissioners within the next 90 days. Note that approval of this resolution does not constitute final approval for the project. Final approval for the project to proceed and a commitment of funding would only come with approval of the interlocal agreement. If the attached resolution is not approved, staff will notify the County that we do not intend to partner on the proposed facility, and we will await further direction from the Commission.

Staff Recommendation

Staff believes a partnership with the county is the most prudent action from both a financial and operational perspective and therefore recommends approval.

Resolution 2023-57 List of Terms

RESOLUTION 2023-57

A RESOLUTION OF THE CITY OF BRENTWOOD, TENNESSEE AUTHORIZING STAFF FOR THE CITY OF BRENTWOOD TO PROCEED WITH FORMAL NEGOTIATION OF AN INTERLOCAL AGREEMENT BETWEEN THE CITY OF BRENTWOOD, TENNESSEE AND WILLIAMSON COUNTY, TENNESSEE ON THE DEVELOPMENT OF AN INDOOR RACQUET FACILITY ON CITY-OWNED LAND IN CROCKETT PARK

NOW, THEREFORE, BE IT RESOLVED BY THE CITY OF BRENTWOOD, TENNESSEE, AS FOLLOWS:

SECTION 1. That staff are authorized to proceed with formal negotiations for preparation of an Interlocal Agreement between the City of Brentwood and Williamson County, Tennessee on the development of an Indoor Racquet Facility on City-owned land in Crockett Park, with a proposed list of terms that are intended to be the priorities for the City in negotiation of the interlocal agreement being attached hereto and made a part of this resolution by reference.

SECTION 2. That this resolution shall take effect from and after its passage, the general welfare of the City of Brentwood, Williamson County, Tennessee requiring it.

MAYOR

Mark W. Gorman

BRENTWOOD/WILLIAMSON COUNTY INDOOR RACQUET FACILITY INTERLOCAL AGREEMENT OUTLINE OF TERMS

- 1. The partnership agreement would be similar to the existing indoor soccer facility. The property and structure would be owned by the City but operated by the County under a long-term lease with the County assuming all responsibility for operations including utilities and routine cleaning, maintenance, etc.
- 2. The facility is intended to include seven (7) tennis courts and six (6) pickleball courts with a sufficient noise barrier system designed between the two uses.
- 3. The current proposed design for the facility consists of a permanent bubble structure with a connected brick and mortar building consisting of an entrance lobby, restrooms, offices, and other accessory use spaces.
- 4. Alternative facility designs that reduce costs may be considered provided any alternate facility design must be approved by both parties.
- 5. Maximum project budget of \$12 million with a 50/50 cost share between Brentwood and Williamson County. This includes all site development and utility-related costs necessary for construction.
- 6. The City will be the contracting agency for design and construction and will waive all associated city permit fees except water and sewer capacity/tap fees.
- 7. Williamson County will provide its share of funding to the City on an agreed upon schedule to be specified in the interlocal agreement.
- 8. The county will establish a system to account for the financial operations of the facility separately from all other county park operations so that net revenues from facility operations can accurately be determined.
- 9. A net revenue sharing arrangement shall be established based on the initial 50/50 cost share formula.
- 10. The County shall create a dedicated capital maintenance fund for this facility and an agreed upon amount of annual revenue shall be set aside (prior to revenue sharing calculation/distribution) for major maintenance such as bubble replacement, HVAC replacement, etc. Funds in this capital maintenance fund shall only be used for maintenance projects at the indoor racquet facility and not in any other Williamson County park facility. Any use of funds from this capital maintenance fund shall be agreed to by both parties.
- 11. The City shall have the right to review all financial records for the facility upon request and the County shall provide financial reports to the City no less frequently than quarterly.
- 12. The schedule and operation of the facility must provide for a reservation system that ensures Brentwood residents have first priority access to 50% of available clinic and court contract reservation time.
- 13. The specific details of the Brentwood priority reservation system shall be included as part of the final interlocal agreement to be approved by each governing body.
- 14. The City shall have the right to review all residency records for the facility upon request and the County shall provide residency usage reports to the City no less frequently than monthly.
- 15. The remaining 50% of clinic and court time will be managed in accordance with standard Williamson County reservation policies and procedure.
- 16. The fees charged by Williamson County for facility use, clinics, etc. shall be no less than the fees charged for the same services at other Williamson County facilities providing indoor racquet courts. If Williamson County proposes to charge higher fees at the Crockett facility than at other comparable Williamson County facilities providing indoor racquet courts, the City must approve of the higher fee schedule.
- 17. All individuals working at the facility will be Williamson County employees or contractors and will be subject to the Williamson County personnel policies and procedures.
- 18. The City will be responsible for obtaining and maintaining property insurance for the facility with Williamson County responsible for obtaining and maintaining liability and workers' compensation insurance. All insurance costs from each party will be included in the financial accounting for building operations and factored into the net revenue calculation.
- 19. Should the City elect to increase the scope of the project to incorporate any other facilities or uses not directly related to the operation of an indoor racquet facility, all costs associated with this added scope for the City's benefit would be a 100% City expense.

Brentwood City Commission Agenda <u>Meeting Date:</u> 05/22/2023 Appointment of City Commission Representatives to Various Boards and Committees <u>Submitted by:</u> Holly Earls, Administration <u>Department:</u> Administration

Information

<u>Subject</u>

Appointment of City Commissioners to various boards and committees

Background

At the May 22, 2023 meeting, the Board of Commissioners will appoint from its members representatives to the following boards for two (2) year terms that will expire in May 2025.

1. Environmental Advisory Board*

2. Park Board*

3. Planning Commission (a board member other than the Mayor's designated position)*

4. Tree Board*

(*The Municipal Code provides that the representative of the Board of Commissioners serves a term running concurrently with the representative's term on the Board of Commissioners, or until replacement by the Board of Commissioners. The Board traditionally votes on appointments every two years, following the City Commissioner election.)

- At the August 22, 2022 meeting, Commissioner Susannah Macmillan was appointed to serve on the Library Board for the unexpired remainder of a three-year term ending June 30, 2024. In June 2024, the Board will again appoint a Commissioner representative to the Library Board for a new three-year term ending June 30, 2027.
- 6. The Mayor will appoint one City Commissioner to serve on the **Historic Commission** for a term consistent with the Mayor's term as Mayor.
- 7. The Mayor <u>or</u> a person designated by the Mayor will serve as the City's representative to the Executive Committee of the Metropolitan Planning Organization (MPO), the Regional Transportation Authority (RTA), and the Greater Nashville Regional Council (GNRC).
- 8. The Mayor or a person designated by the Mayor and confirmed by the Board shall serve as

the City's representative to the County Growth Coordinating Committee.

- 9. The Mayor <u>or</u> a person designated by the Mayor will serve on the **Planning Commission** for a two-year term consistent with the Mayor's term. Carole Crigger currently serves in this capacity.
- 10. The Mayor or City Manager (as the alternative) will serve as the City's representative to the **Williamson County Economic Development Council.** Currently, the Mayor serves in this role.
